CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. You do not own or have any interest in the underlying asset. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money. Please consider the Retail Client Product Disclosure Statement (PDS), Risk Disclosure Notice and Target Market Determination before entering into any CFD transaction with IG.

The value of forex, CFDs and CFDs target through an IG share trading account can fall as well as rise, which could mean getting back less than you originally put in. Past performance is no guarantee of future results.

Please ensure you understand how swaps and spreads work to manage your exposures.
