URGENT PUBLIC ANNOUNCEMENT:

Best-Selling Author And Stock Market Legend Predicts:

The 2020 Great FALL of China

Any Patriot That Makes These 2 Simple Moves Could Make Retirement Level Profits As Soon As America Unleashes "Economic Killshot"...

Dear Reader,

For the past 2 decades I've been a professional trader (specializing in macroeconomics) and I've never seen any opportunity as BIG as this one...

It's why I'm going public with my most lucrative prediction in over 20 years... Heck, this might even be the most profitable prediction in the past century.

Here it is:

China is about to have a massive economic fall... **Trillions of Dollars** are leaving the country in the next **18 to 36 months...** And this will bring about one of the **greatest transfers of wealth ever!**

And to top it off...

Any American could make a fortune in the process!

Because we are on the cusp of a trader's dream scenario... And the money has already started to flow...

We Are Already Starting To Profit...

In January of 2020, I issued a China related alert on TME. Giving my readers a chance at a quick 85% gain.

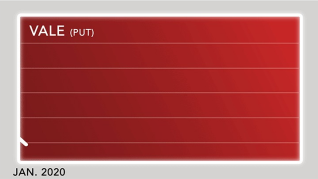
We entered the trade at $1.27 and exited 5 days later at $2.35.

Turning every $1,000 invested into $1,850!

Then again in January, 2020, I issued an "anti-China" alert to my readers on VALE, a company with strong ties in China.

We entered the trade at $0.54 and exited two weeks later at $1.29 for a 138% Gain!

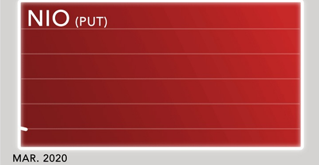
Turning every $5,000 invested into $11,900!



Then in early March, 2020, I issued another "anti-China" alert to my readers on NIO.

Entering at $0.79 and 5 days later exiting at $1.22 for a 54% Gain!

Providing a chance to quickly turn every $10,000 invested into $15,400!



Imagine nearly doubling your money every 8 days!

But that's just the tip of the iceberg...

When China's economy finally crashes we could easily be looking at trades capable of producing $3,745 for every $1k invested... $23,823 for every $5k invested... Or even $30,816 for every $10k invested!

And it could happen much sooner than you might think...

Listen, I know this isn't the first time you've heard that China's economy is headed for a potential crash...

I mean, Just look how WRONG the mainstream financial news has been about it in the past...

Over the last couple decades the media has been pretty vocal about predicting **China's "Big Economic Fall":**

The Coming Collapse Of Consumption In China

- Forbes (September 30, 2012)

Is China's economy heading for a crash?

- BBC News (July 13, 2012)

Data Signals Economic Trouble in China

- NY Times (May 11, 2012)

However, I'm quite sure you've noticed that the exact opposite has happened... China's GDP has done nothing but go up.

Just Look At This Chart:

This chart shows China's 50 year GDP history.

It's been rising steadily over the past two decades... Even when all the media outlets were touting economic collapse... It just kept on chugging away.

That is until around 2018 when something strange happened... You can see the chart finally slow down and flatten out.

In the trading community we call that a reversal... Or at least the beginning of one.

Based on the chart alone most people have no way of knowing if it will turn into a full fledged reversal (go down) or if it will correct course and continue its massive upward trend.

But when we dive in a bit deeper and look at the reasons behind this chart's sudden shift of momentum, it all begins to make much more sense.

The details shed light on why this could be one of the biggest investment opportunities of our lifetime...

So let's dive into exactly what's brewing here.

In 2018, President Donald Trump set in motion policies that just might cripple the Chinese economy...And allow any American to make a fortune in the process.

But you don't even need to like or support Trump to cash in... that's because Trump is not the only reason this is happening.

He's just adding fuel to a fire that has been burning for years.

Let me explain...

Over the next few minutes I'm going to show you exactly...

Why China's Economy Is Finally Going To Fall. (These Forces Make It An Almost Inevitable Outcome)

After you read this you'll realize 3 things.

1. China is headed for a major crash.
2. The rest of the world is waiting in the wings to capitalize on this crash. And...
3. The top traders in the world are going to make a ton of money... And you can too!

We are in the beginning of the **multi-trillion dollar economic tipping point...**

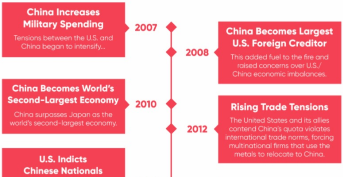
It's much more likely to happen now than anytime before...

Pay close attention because I'm going to show you exactly how you can prepare to take advantage of this incredible opportunity...

But first, it's important you fully grasp what's happening so you understand exactly how we got here...

This 'Economic Pot' Has Been Heating Up For Years And Is Ready to Boil Over...

The following timeline of events are courtesy of www.cfr.org



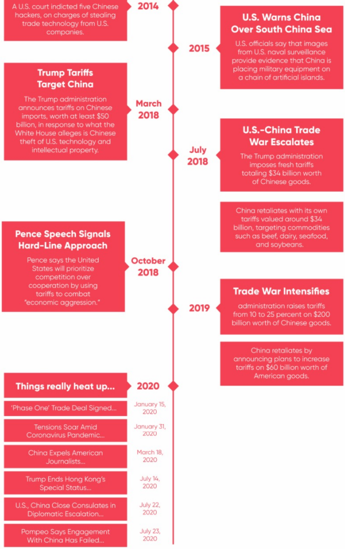
China Increases Military Spending
2007
Tensions between the U.S. and China began to intensify...

China Becomes Largest U.S. Foreign Creditor
2008
This added fuel to the fire and raised concerns over U.S./China economic imbalances.

China Becomes World's Second-Largest Economy
2010
China surpasses Japan as the world's second-largest economy.

Rising Trade Tensions
2012
The United States and its allies contend China's quota violates international trade norms, forcing multinational firms that use the metals to relocate to China.

U.S. Indicts Chinese Nationals



2014
A U.S. court indicted five Chinese hackers, on charges of stealing trade technology from U.S. companies.

2015
U.S. Warns China Over South China Sea
U.S. officials say that images from U.S. naval surveillance provide evidence that China is placing military equipment on a chain of artificial islands.

March 2018
Trump Tariffs Target China
The Trump administration announces tariffs on Chinese imports, worth at least $50 billion, in response to what the White House alleges is Chinese theft of U.S. technology and intellectual property.

July 2018
U.S.-China Trade War Escalates
The Trump administration imposes fresh tariffs totaling $34 billion worth of Chinese goods.

China retaliates with its own tariffs valued around $34 billion, targeting commodities such as beef, dairy, seafood, and soybeans.

October 2018
Pence Speech Signals Hard-Line Approach
Pence says the United States will prioritize competition over cooperation by using tariffs to combat "economic aggression."

2019
Trade War Intensifies
administration raises tariffs from 10 to 25 percent on $200 billion worth of Chinese goods.

China retaliates by announcing plans to increase tariffs on $60 billion worth of American goods.

2020
Things really heat up...

'Phase One' Trade Deal Signed...	January 15, 2020
Tensions Soar Amid Coronavirus Pandemic...	January 31, 2020
China Expels American Journalists...	March 18, 2020
Trump Ends Hong Kong's Special Status...	July 14, 2020
U.S., China Close Consulates in Diplomatic Escalation...	July 22, 2020
Pompeo Says Engagement With China Has Failed...	July 23, 2020

This timeline paints a clear picture of exactly how things have escalated over time...

It also reveals why this time is much different than anytime before...

Make no mistake this is a rare window of opportunity to make massive returns... Because many companies will benefit greatly from China's collapse...

Just like these...

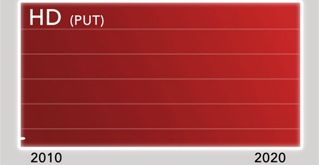
Companies Not Dependent On China Have Skyrocketed Up To 6,808% In The Past Decade...

Companies like Amazon ticker symbol AMZN...

Which would have turned every $10,000 invested in 2010 into $270,666 by 2020!

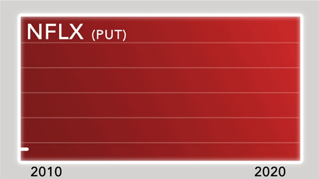
Or Home Depot ticker symbol HD...

Which would have turned every $10,000 invested in 2010 into $86,125 by 2020!



And don't forget about companies like Netflix ticker symbol NFLX...

Which would have turned every $10,000 invested in 2010 into $86,125 by 2020!



These are instant retirement level gains we are talking about here...

But we all know you can't go back in time to invest in these companies...

However, what's about to happen next could surpass all the gains you just saw...

So pay close attention...

Because my team and I have identified 4 reasons why it's TIME to bet against China...(more on that in just a minute.)

But first...

Let Me Properly Introduce Myself...

My name is Rob Booker.

For those of you that don't know me, I'd like to share a few things with you...

I'm the author of two best-selling books **"Trading by Faith"** and **"Adventures of a Currency Trader"**

I've been featured on **CNBC** and quoted by **The New York Times, Money Show** , and **TradersExpo...**

And I run two highly successful podcasts featuring many of the world's most elite traders.

I'm also the editor of a few newsletters that help tens of thousands of readers learn how to become better traders.

Now, I'm not telling you any of this to brag, but instead, to let you know that trading is my bread and butter... It's my calling in life... And I've been very fortunate to experience tremendous success with it...

But, don't get me wrong, It hasn't always been easy...

I've traveled a long road with many ups and downs along the way...

So it's my life's mission to help other traders avoid making the same mistakes I did...

That's why I'm always searching for opportunities to help others make a lot of money...

During my 21 year career I've pretty much seen it all.

I know what it takes to be successful... And my specialty is how to profit from major economic events...

That's why I'm so excited for the opportunity here.

The cards are ready to be dealt...It's time to place our bets.. And I know where my bet is going...

Do you?

4 Reasons Why It's T.I.M.E. To Bet On The U.S. And Against China...

Tariffs - The trade war between U.S. and China has been raging on for a while now...With no hint of slowing down.

With 25% tariffs placed on $200 billion of Chinese goods. President Trump is still threatening to slap duties on another $325 billion of goods.

These are some bold moves made by Trump, which make it even harder for China to dominate the global supply chain, like they've been doing for many years...

But again, if you're skeptical like me you're probably thinking... "Hey Rob, thanks for this information, but it's an election year and Trump could lose. Wouldn't this all change if someone else takes over?"

And that's a good point...These tariffs very well could change or disappear completely if someone else took over.

Which is why we also have 3 (potentially bigger) reasons that don't rely on Trump's re-election.

Intellectual property - It's no secret that China has been meddling with United States Intellectual property for many years now...

It's actually far worse than anyone could have imagined.

> "According to some reports, Chinese IP theft has cost the United States between $225 billion to $600 billion a year. No wonder getting China to better protect IP is a point of rare consensus among both the White House and the Democratic leadership."

IP theft is a problem for the U.S... It's a HUGE problem.

It's one of the few points Republicans and Democrats agree on these days.

And that won't change regardless who is in the White House.

Next we have...

Manufacturing Hubs Moving - There are two highly important points to look for here...

The first one is that a recent Gartner Survey Reveals 33% of Supply Chain Leaders Moved Business Out of China or Plan to by 2023.

That's 33%! Meaning ⅓ of supply chain leaders plan to leave the country by 2023...

But the second point is even more interesting.

It's not just foreign companies...

"60 percent of Chinese manufacturers also said they were planning to move at least some production from the mainland"

This is evidence that it's not only about the U.S./China conflict. But instead it's also hinting at some very real problems facing the Chinese economy.

Which leads me to the final reason China is in hot water...

Export subsidies and lax labor - Another well known and highly publicized fact about China is that they are known for treating their workers very badly...

Whether it's having underage children working in factories... Or forcing workers to work insane hours... One thing is very clear.

China has gained an unfair advantage through treating it's people poorly.

According to an article in the NY Times...

White House trade adviser Peter Navarro claims:

> "China has managed to dominate all aspects of the supply chain using the same unfair trade practices that it has used to dominate other sectors — cheap sweatshop labor, lax environmental regulations and massive government subsidies... As President Trump has said, what we need to do is bring those jobs home so that we can protect the public

health and the economic and national security of the country."

Those are some pretty powerful reasons why China is in hot water right now...

But what does this all mean?

Well...

There Are Two Ways T.I.M.E. Will Help You Make More Profit...

With China's economic collapse highly likely to happen, here are two main reasons why this is such a perfect time to start cashing in:

1. **A Prioritization on growth in America** - There is a huge focus on shifting manufacturing back to the United States.

   This shift will bring Billions or potentially even Trillions of dollars of wealth back to American soil.

   Which will also bring about an abundance of high profit potential investments for any American who makes the two moves I'm about to reveal.

   And will simultaneously lead to...

2. **A popping of the "Bubble" in China's unprecedented economic growth** - Many Chinese companies have over inflated values, and are going to be at risk of becoming worthless...

   This will also create an incredible opportunity for profit...

   Because it doesn't matter which direction the market goes, You can still profit as long as you know the direction it's moving.

   That last statement has made me a lot of my money during my trading career...

   And it's enabled me to provide my readers with an almost endless supply of opportunities to profit. Readers with gains like...

Closing in on having taken my $450k of assets to $2.5M. Crazy. Thanks.

Jeff T.

I'm up 30%, loving this service Rob Booker!!!

Seven C.

Up 147% since our entry point. I am going to take half my trade off the table and guarantee a win.

Tom B.

Up 19%+ on NIO so far. Took that trade a couple days ago.

Jim T.

Sold PAGS for an 84% gain this morning. That made my day! Thanks Rob and Scott!

Hans S.

Just got out of RSX with a profit of 112%. Wow!

Barbro A.

And this is just a small fraction of the satisfied readers my team and I have helped through our incredible research.

But it's also just the tip of the iceberg...

What's happening with China right now, could produce an opportunity much bigger than anything we've ever seen before.

As a macroeconomist, it's my job to study the major economies around the world... I've been doing this for over 21 years now... It's why I've been preparing for China's impending economic collapse for the past few years.

And by now you should realize this is not going to be another one of those premature news stories claiming China is going down.

This opportunity has been building up for over a decade now...

It's going to be big...

And a lot of money will be made...

That's why we've identified two ways you can profit from the chaos right now...

How We Plan To Make The Most Money Off The US / China Conflict...

The first way we are going to make money is by investing in U.S. companies that will gain the most value during the chaos.

We've identified some industries and companies that could significantly increase in value during this crazy time.

Including manufacturing companies to tech companies and everything in between... We will leave no stone unturned in our quest for the highest profits...

And on top of that...

The second way we are going to profit is by betting against Chinese companies that will lose their value...

Just like the companies we've already started tracking, many of which currently have over inflated values...

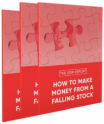
Which you can access immediately...

Here's Everything You Need To Know Right Now In Order To Rip Insane Profits From This Opportunity...

It's all detailed in this special report:

How To Make Money From A Falling Stock

In this special report you'll gain insight into my fool-proof method for identifying stocks that will decrease in value AND more importantly how to profit from them. This strategy is how we've been able to spot countless profitable trades on falling stocks, just like the 138% gain we took on VALE earlier this year!



I've also put together another special report to help you identify massive profit opportunities RIGHT NOW with:

THE GDP REPORT
5 CHINESE STOCKS TO TURBO-CHARGE YOUR RETIREMENT

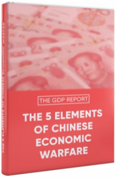
5 Chinese Stocks To Turbo-Charge Your Retirement

This report could be an instant retirement maker. Because China is headed for some serious economic turmoil. This report will give you access to the TOP 5 Chinese Stocks that currently have over inflated values. When these 5 stocks lose their value we will make a fortune in the process!

And if that wasn't already good enough we've also arranged another special report titled:

The 5 Elements of Chinese Economic Warfare

In this report you get access to my good friend Andrew Bustamante who is a former covert CIA intelligence officer, decorated wartime military veteran, US Air Force Academy graduate, and successful Fortune 10 corporate advisor. After 15 years in service to his Nation, Andrew skyrocketed through corporate America specializing in human and technical operations. With more than 20 years experience in both private and public sectors, Andrew has become a highly demanded international private intelligence consultant.



The 5 Elements of Chinese Economic Warfare will provide you with a detailed overview of what's currently happening in China so you can be better prepared to profit from the Chaos.

In addition to these three hard hitting reports we've also created a way for true American patriot's to easily pull tremendous gains from U.S. companies that will dominate from China's struggles.

It's all possible with:

THE GDP REPORT
MONTHLY PATRIOT CASH MACHINE WATCHLIST

The Patriot Cash Machine Index (updated monthly)

With China's economy heading for a major collapse it will create a ton of opportunity for companies in the US to increase in value. So we decided to put together a watchlist of the TOP US companies that we think could explode in value when China's economy falls. This list will be updated every month to keep the most current high probability companies on the forefront.

All this can be yours when you join my elite level, profit producing **The GDP Report...**

The only report that focuses on U.S. / China relations from a macro economic level... To provide readers the surest ways to rip huge profits from the market based on China's impending economic downfall...

Each month will focus on the best American company and Chinese company that are poised to produce the largest profits...

That's how it got the name **The Great Double Profit Report.** Or **The GDP Report** for short...

You will receive 12 issues over the next 12 months. That's over 24 recommendations designed to help you thrive during this once in a lifetime opportunity.

Every month we'll find the most up to date information regarding the US / China conflict.

We'll give you the good, the bad, and the ugly truth...

But we'll also give you recommendations on how you can take advantage of this information...

And hopefully make some good money in the process...

Just imagine what life will be like when you are nabbing life-changing gains, month after month...

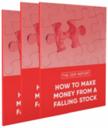
Imagine being able to take that vacation you always dreamed of... or spend more time with those you love most... or even just kicking back watching your favorite TV show... Instead of constantly worrying about money.

Regardless of your reason for wanting to make more money, my goal with **The GDP Report** is to help you make it a reality.

To Recap Here's Everything You'll Get Today

As soon as you join **The GDP Report** which retails for $497 per year (but you won't have to pay anywhere close to that) You'll get the following bonus reports absolutely FREE.

★ **Bonus #1: Special Report - How To Make Money From A Falling Stock ($47 Value)**



THE GDP REPORT
5 CHINESE STOCKS TO TURBO-CHARGE YOUR RETIREMENT

★ **Bonus #2: Special Report - 5 Chinese Stocks To Turbo-Charge Your Retirement ($97 Value)**

★ **Bonus #3: Special Report - The 5 Elements of Chinese Economic Warfare ($47 Value)**

THE GDP REPORT
YOUR FIRST ISSUE OF THE GDP REPORT

THE GDP REPORT
MONTHLY PATRIOT CASH MACHINE WATCHLIST

★ **Bonus #4: Monthly Patriot Cash Machine Watchlist ($497 / Year Value)**

That's a total value of **$688!**

I think you'll agree everything here could dramatically improve your life...

That's why we originally planned to charge $497 per year for access to this information... Which is an incredible value considering everything you get.

Just a few good trades and this service would pay for itself...

But since you've taken the time to read this far I have a special offer just for you...

Right now you won't pay anywhere near $497... What's happening with China right now is a once in a life-time opportunity...

And I want to help as many people as possible benefit from this opportunity...

So I've decided to offer a **Fast Mover Discount** to those that take immediate action...

Right now you can grab everything for just $49 per year...

That's right only $49 per year (that's 90% off!)

It's my way of showing respect for people that recognize a good opportunity when they see it and are willing to take immediate action.

BUT...

I also know some people will drag their feet... Make every possible excuse not to take action... And walk away hoping to grab it "sometime in the future" after they let all the opportunity pass them by.

For that reason, I can only offer this **Fast Mover Discount** on this page only... Once you click away this special discount is gone forever.

So please don't let this pass you by.

To get The **GDP Report** , where you'll get immediate access to all the bonuses, 24 high profit recommendations every year, and the Fast Mover discount... Simply click the link below.

Click Here To Claim The GDP Report For 90% OFF!

And if all that wasn't already a no-brainer...I'll even throw in my 100% Satisfaction Guarantee.

100% Satisfaction Guarantee

If during the first 90 days you are not completely blown away by everything you get in The GDP Report, we will issue you a 100% no questions asked refund...Plus you can even keep all the bonuses as our way of saying thanks for taking immediate action.

You truly have everything to gain and nothing to lose.
