"I chose fun, bright elements for this home office to play up the personality of the homeowner," says Ashley, who's based in Houston, TX. "The walls went from dark wood paneling to fresh blue-green (Moon Glass by Behr); an oval dining table makes a cool desk paired with velvet chairs; and gold touches tie the room together. Something that surprises people: The 'credenza' is actually side-by-side cabinets from IKEA! I DIYed a toe kick to make them look custom."
