Your Wellness  
Journey  
Starts Here

The Biomed Center of New England combines expertise and state-of-the-art facilities to offer an unparalleled array of treatments. Our services can alleviate conditions by addressing their underlying causes on the cellular and systemic level.

## How is our care different?

The Biomed Center of New England is changing the way medicine and dentistry is practiced through care that is:

**Innovative:** Addressing root causes with evolving technologies

**Integrated:** Combining holistic dental and medical care under one roof

**Supportive:** Promoting your physical, emotional and spiritual wellness

**Personalized:** Creating a transformative treatment path as unique as you are

# Help Your Body Heal Itself

At the BioMed Center New England, our multi-level approach emphasizes comprehensive assessments and collaboration. Our experienced biomedical doctors consider personal history and all of the unique elements and experiences that contribute to a patient's emotional and physical make-up.

## Small Details Make a Big Difference

The contrast with conventional care starts the second you step in the door. Instead of a generic waiting area, a lush environment invites self-nurturing and contemplation. Once ushered inside for a consultation, care coordinators ensure collaborative treatment for whole-body health.

## Get Personalized Care to Support Holistic Health

We believe in a different kind of healthcare that truly focuses on the patient. If you're frustrated with your current medical care, not getting the answers you need, or simply looking for a change, we're ready to help you achieve your health goals.

## Dental Healthcare for Whole-Body Health

The mouth is the gateway to the rest of the body. Bioregulatory, or holistic dentistry, is not a separate specialty but a shift in the perception of dentistry and what it encompasses. Instead of viewing the mouth in isolation, this approach recognizes the essential and synergistic connections between oral health and overall health. By concentrating first on the causes of oral health problems rather than just treating them, bioregulatory dentistry supports your overall health.
