

Best Blue Raspberry Vape

Blue Raspberry was first introduced on the market as a flavor in Cincinnati for a new Italian ice. Since, it's become one of the most popular candy, gum and beverage flavors on the market. It's a mix that's difficult to pin down; one of ripe, fresh blueberries and red raspberries highlights the tartness of both, with an icy coolness that's usually only achieved in Lemonade.

So of course, there's no shortage of blue raspberry vape flavors to choose from, each trying to perfectly capture the sweet tart and rich, sugary candy mix that you grew up loving. So we scoured the internet to find what we consider the very best on the market. This was one of our more fun experiments, as each flavor brought with it something unique.
