From the Blessed-Herb: Organic Broad and Full spectrum CBD.
Nature's finest medicine.

Organic & Non-GMO: Our organic CBD oil is extracted from hemp grown without the use of harmful pesticides, hormones, or fertilizers. See collection

CBD capsules and edibles: High-quality, vegan, non-GMO treats made with organic CBD. See collection

CBD flower: Premium CBD flower buds organically grown in the USA. See collection

We believe nature knows best: Our CBD is lab-tested and guaranteed to be free of contaminants, synthetic additives, pesticides, chemical fertilizers, and dyes. Our CBD is not processed using industrial solvents, irradiation, or genetic engineering.

We are proud to provide you with some of the market's highest quality CBD.

About Us

In 2021 Beni-Bush was established in Massachusetts. The owner has been involved with the cannabis industry for over ten years and has worked hard to bring customers the highest quality products possible. He has a passion for natural remedies and believes nature knows best. During his research, he realized most pharmaceutical drugs were originally derived from plants. He asked himself, why not skip the extra chemicals and go right to the source? Especially since synthetic drugs can often have harmful side effects. The cannabis plant has been used to heal people for thousands of years. Yet, only recently is modern medicine catching up and discovering the benefits of this blessed herb. We want to reach out and educate people within urban communities about the wonders of nature and show them how CBD can enhance their lifestyle.

Beni-Bush actually means "blessed herb." To us, this isn't just a phrase. We believe it. This is why we approach the plant, farming practices, production, and customers with respect and reverence. We work directly with certified farms and suppliers that employ sustainable practices. Beni-Bush is one of the few companies that sells USDA Certified Organic tinctures. In addition, our products are vegan, non-GMO, and grown in the USA. While some companies use cheaper industrial hemp, we opt to use potent Phytocannabinoid-Rich (PCR) hemp strains.

Since CBD can be consumed in different ways, we wanted to offer a variety of products to have something for everyone. We even have a tincture for pets.

Store

CBD Gummies:

These fun and tasty CBD gummies are sure to be a hit. They are easy to take, discreet and reliable.

We strive to use the most natural products available. Our gummies are no exception. They include 10mg of organic CBD, organic tapioca syrup, and organic cane sugar. They are gluten-free, vegan, and THC-free. You'll love the vibrant flavors of green apple, strawberry, and lemonade.

CBD Soft Gels with Curcumin:

Here at Beni-Bush, we have a deep love for humanity. We want to provide people with reliable options for real-life issues. Our CBD Soft Gels with Curcumin are a great example of that. Joint pain is a major source of discomfort for millions. For thousands of years, humans have used Curcumin, a naturally occurring compound in turmeric, for healthy joint function. The pairing of curcumin with our organic broad-spectrum hemp oil provides relief when you need it most.

Our hemp oil contains cannabitol, other minor cannabinoids, and terpenes. The synergetic effect of these compounds creates something called the entourage effect. Science has discovered that when these compounds are combined, they produce more of an effect than they would on their own. Think about each one of these compounds as a musician. One musician can play the guitar, but multiple musicians can create a layered tapestry of sound.

You don't have to worry about getting high from this or any of our CBD products. We source our CBD from hemp plants that contain a negligible amount of THC. After that, we take steps to remove the trace amounts of THC, so there can be no false positives on a drug test.

Our proprietary nano-technology reduces the size of the CBD particles so they can be easily absorbed. CBD is a large molecule, and as such, it sometimes doesn't get absorbed completely by your body. With nano-technology, we bypass this problem and create CBD that has more bioavailability and quicker absorption. Within minutes of consumption, the compounds enter your bloodstream and pass through the blood-brain barrier. Our soft-gels work faster and last longer than other CBD brands. This is another way we at Beni-Bush are working hard to provide you with the highest quality product.

Fresh Lemon Organic CBD Tincture (Broad Spectrum)

Our great-tasting lemon formula is something you're sure to love. This CBD tincture contains no THC but combines all the other plant compounds to provide you with the best possible experience. We use only the highest quality carrier and essential oils. There are absolutely no artificial flavors or colors in this product.

Each bottle contains 30 servings. Potency and purity are assured through third-party lab testing.

Fresh Lime Organic CBD Tincture (Full Spectrum)

This full spectrum tincture has a refreshing lime taste and only uses four premium ingredients.

Our CBD oil is USDA Certified Organic and contains all the plant compounds such as cannabinoids, terpenes, flavonoids, and less than .3% THC. These combine to provide the full entourage effect. Together they synergistically bring the body back to homeostasis, wellness and balance. Keep in mind that this product contains a minimal amount of THC. It isn't enough to get your high, but it could cause a false positive on a drug test.

Each bottle contains 30 servings. Potency and purity are assured through third-party lab testing.

Premium CBD Pet Tincture for Dogs and Cats (Broad Spectrum)

If you are like us, you love your animal friends and want to offer them the best possible support. This is why we created our CBD Tincture for Pets.

Beni-Bush's CBD Tincture for Pets is fast-acting and has a natural flavor that pets will enjoy. It is easiest to mix a few drops in your pet's favorite food, but you can also drop it directly into their mouth. This phytocannabinoid-rich product contains all the essential compounds of the hemp plant, such as terpenes, cannabinoids, and flavonoids. Except, it contains absolutely no THC. Meaning your pets can experience healing without experiencing the side effects of getting high.

This product has been known to greatly enhance a pet's quality of life. If you've found relief with CBD, don't hold out on your furry friends. They deserve the same quality care as you.

Hawaiian Haze 3.5g

This is a somewhat mysterious plant. Hawaiian Haze is a popular marijuana strain that was bred with a high CBD hemp variety. This allowed the plant to keep its tropical flavor and powerful effects, but with less than .3% THC.

The strong tropical flavor is a defining trait of our Hawaiian Haze CBD strain. The pine and peppery smell suggest that it contains terpenes such as myrcene and alpha-pinene, which have unique benefits. It is very uplifting and energizing.

These fluffy, vibrant green buds are contrasted with bright orange hairs creating a truly picturesque flower. Be aware that even though this plant is legal, it looks and smells like marijuana. Law enforcement may not be able to tell the difference. So, if marijuana isn't legal in your state, it may be prudent to keep these beautiful buds out of sight.

Sour Space Candy 3.5g

This powerful CBD strain tops out at a whopping 20% CBD and less than .3% THC. It also contains high levels of terpene myrcene, which is a strong anti-inflammatory. This plant's lineage comes from a cross of Sour Tsunami and Early Resin Berry (ERB). Sour Tsunami creates

the base fruity taste, while ERB creates the high notes of sweet berries. Together they create an aroma that has been compared to sweet and sour candies. This flavor has made Sour Space Candy wildly popular.

In these dense buds, you'll find purple, green, and orange tones. Sour Space Candy contains a lot of resin and has an astonishingly high CBD content.

This flower can help you relax day or night by providing mellow effects and delicious flavor.
