This is an incredible little machine. I was a bit skeptical when my wife first brought home the Moose, but after a few weeks of using it, I definitely won't be going back to my old routine. The heated foam really helps open up my pores and soften my skin. This has greatly increased the ease by which I am able to get ready for work. Not only that, but there's just something extremely luxurious and cool about having a heated foam shave right in the comfort of your own home. I never realized how much I prefer a hot shave to a normal cold one. Something else I love about the Moose is that there's minimal waste. Unlike my pod-based coffee maker, which can quickly produce a mountain of empty plastic containers, the Moose pods fully dissolve into foam, so the only waste is the minimal packaging they come in. Overall I'm really glad my wife discovered the Moose and took a shot on it. It took no effort to set up and use. It makes a full cup of foam in about 60 seconds, depending on the mode. The applicator is a wonderful inclusion. I can't tell you how nice it is to not have to cover my hands in shaving cream and make a massive mess every other day. This is just yet another small change I never knew would make such a massive difference for me. I highly recommend the Moose to any man who shaves on a regular basis or really values self-care.

#2. Marco DiSilvia - Austin, Texas - 5 Stars

I've been a massive fan of hot shaves for years, so I was extremely excited to purchase the Moose. After a few months of using it, I can honestly say it offers a comparable experience to professional barber shaving foam at a fraction of the cost. The thick foam smells fantastic and really makes shaving a whole lot easier. The high-quality razor provides an exceptional shave every time I use it, and I love the applicator a lot more than I thought I would.

We've got a pretty small bathroom, so I really appreciated the removable cup since it meant I didn't need to store the machine in there. Over the years, our bathroom has become cluttered with all types of products and devices, so I take any opportunity I can to avoid adding to that mess! I just set the machine to work in my bedroom, and once the foam is ready, take it with me into the bathroom. I love how the cup radiates heat even after you remove it from the base, keeping the foam warmer for longer during application.

Everyone deserves to experience the pure pleasure that is having a nice hot foam shave in your own bathroom. If you're like me and been waiting for a product like this for years, now is your moment!

#3. Anthony Shahedi - St. Paul, Minnesota - 5 Stars

I bought my Moose the other week and have been very happy with my purchase so far. Not only does it work precisely as advertised, which is an increasingly rare thing in online shopping, but it actually far exceeded what I was expecting in terms of shave quality.

If you live in a colder part of the country, you'll never want to go back to a cold shave after trying the Moose. Seriously. There's just something about starting your day with a hot shave that really sets the right tone. I feel exhilarated and ready to tackle today's challenges once I step out of that morning shower.

Shaving always used to be a massive hassle for me since my hair is so thick and hard to trim effectively. However, the hot foam softens my face and hair quite a lot, making it substantially easier to get a close shave.

The applicator and included razor both do their job perfectly well. I found it interesting that instead of being a brush, the applicator has a sleek, smooth design that feels somehow old school. Cleanup is also super easy, just taking a quick rinse.

I really recommend the Moose to any guy out there who wants to take a massive step forward in their daily care routine. It's especially game-changing for anyone like me who has thick, coarse facial hair.

#4. John Bennett - Orlando, Florida - 5 Stars

The Moose is great! I grabbed this device recently on a whim, not realizing I was about to fall in love! I can't believe I spent so many years shaving my face with cold shaving cream like a chump! Not only that, but I really appreciate how conscious MooseCare is about waste. The pods are 100% biodegradable and fully dissolve. Even their packaging is made to not use excess, unneeded plastic. I also loved how they offer different types of pods for different needs. I especially liked the sensitive skin formula, which really helped keep my skin from getting irritated like it typically does during a shave.

I just really appreciate how much time and thought was put into the Moose. Not only does it work as well and as quickly as you would expect, but their attention to detail is also evident. Small quality of life choices, such as making the silicone applicator and removable foam cup, both retain heat were ingenious additions. This is precisely the kind of thing I'm not sure I would have noticed if it wasn't standard, but now that I know the difference, I wouldn't have it any other way.

I don't see any reason someone wouldn't want to use this device. Even women can take advantage of this incredible shave wherever they need it, as my wife will attest to. The dense foam smells great and actually preps my skin for a good, close shave. Do yourself a favor and pick up a Moose!

#5. Robert Wygal - Sunnyvale, California - 4.5 Stars

Using the Moose has been a lot of fun. I never thought I would think about shaving in such a way, but here we are haha. Something about the ritual of prepping for a nice hot shave just adds immensely to the overall experience. It's hard to explain, but aside from the obvious advantages

of hot foam over cold when it comes to shaving, the Moose just feels better and more fun than your traditional shave.

I've purchased somewhat similar devices in the past, but most of these were total failures. Either they didn't heat the shaving cream up nearly enough, they leaked, or they just got clogged after a couple of uses. So I was delighted to find that none of these things is an issue when it comes to the Moose. Cleanup only requires a basic rinse since the pods dissolve completely.

The sleek design fits well into my home, and I've even gotten a few friends interested enough to buy one themselves. It is a bit larger than I thought it was going to be, so it doesn't really fit that well in my bathroom. That said, the removable foam cup means this really isn't a problem. Plus, since it retains a lot of heat, it keeps the foam warm even when it's detached.

I can't wait to try some of the other types of pods available, especially the moisturizing blend.

Overall I highly recommend the Moose. Just think of all the time you spend shaving. Once you make the switch to hot shaves at home, you won't go back.

Mid-Sized Reviews (100-200 words)

#1. Joe Baker - Overland Park, Kansas - 5 Stars

I'm not usually one to put a lot of fuss into my daily grooming routine, but I have to admit the Moose has been a game-changer. When my girlfriend first brought it home, I was definitely a bit skeptical, but after that first shave, I was a believer. It's insane how clean of a shave you can get and how nice it feels to use warm foam. It's also really easy to clean. You don't have to commit to an intensive cleaning process every time you need a quick shave. In fact, just a quick rinse is all it usually takes for me to get everything ready for next time. Anyone who shaves regularly needs the Moose!

#2. Tom Kaminsky - Durham, North Carolina - 5 Stars

I'm happy to report the Moose has met or exceeded all of my expectations! As somewhat of a stickler for a quality care routine, I was definitely doubtful about how well it would work. Well, boy were my suspicions misplaced. The Moose offers a super-rich and thick foam that remains warm long enough to be effective.

Plenty of other devices out there claim they offer a "heated" shaving experience, while actually being lukewarm at best. Depending on the setting you choose, I found the foam will be consistently above 160 degrees Fahrenheit. The accessories that came with my Moose also do an admirable job supporting the experience, especially the heat retaining applicator.

The Moose ended up being a pleasant surprise that's become a normal part of my self-care routine. I love it!

#3. George Anderson - Lake Oswego, Oregon - 5 Stars

My wife brought home the Moose recently, and it's been a major revelation. I finally understand the draw of a nice hot shave. Shaving has always just been a chore that needed to get done, but now it's become something much more than that. Now when I get ready to shave, I almost

feel like I'm about to embark on some kind of adventure. There are also a couple different modes to choose from, which I appreciate as someone who loves to find my own ideal settings. More than just making my life a lot easier by offering a very close shave with less effort, my shaving time has now become sacred to me. It's a welcome chance to relax and feel like a king! The super-dense foam is easy to work with, and all the different types of pods I've tried have been fantastic. If you want to start treating yourself like the king you are, you need a Moose!

#4. John Hillard - Knoxville, Tennessee - 5 Stars

This is one of my favorite new products. I used to get hot shaves at my hometown barber, but when I moved my mother bought me the Moose. It gives me a way to get that warm shave at home without all the fuss of going to a professional in the city. I have really thick hair, and my skin takes quite a beating whenever I shave with cold shaving cream. Using heat helps open up my pores and allows the hair to be cut with ease. More importantly, their sensitive skin pods do a fantastic job, not bothering my skin. But probably the best thing is the pods are so affordable and easy to get thanks to their auto-replenish system. I used to have to skip the barber from time to time to save money, but that's never going to be an issue for me again!

#5. Adrian Diaz - New York, New York - 5 Stars

I have to shave every other day for my job, and it's always been a chore that I really hate. Between the mess, it makes, how long it takes, and the cold sensation, it's something I always wished I could get around. However, the Moose has given me a new lease on shaving. The foam is hot and ready to go in 60 seconds, and the applicator helps keep the mess to a minimum. Now that I can get a high quality, hot shave at home, it's actually something I look forward to most of the time. If someone had told me that was possible a year ago, I would have had a good laugh about it! Thank you so much, MooseCare!

#6. Aaron Zylinski - Tacoma, Washington - 5 Stars

I'm very environmentally conscious, so I was distrustful of a pod-based shaving device when I received it as a gift. However, after doing a bit of research, I was pleased to find how much time and effort was put in by MooseCare to make their product as environmentally friendly as possible. Most pod devices leave behind them a trail of empty plastic pods, but not the Moose. Their 100% biodegradable pods dissolve leaving nothing leftover. They've even supposedly put some serious time and money behind developing minimally impactful packaging. All of this stuff is a big selling point for me personally.

Outside of that, the Moose works exactly as intended. It gives me a nice full cup of warm foam in just under a minute or so. The foam is thick and super useful, and it just takes a good rinse to clean everything.

#7. Oscar Young - Tampa, Florida - 4 Stars

Call me a believer! When my daughter purchased the Moose for me, I wasn't entirely sure what to make of it. Technology really isn't my cup of tea, so I was worried it would be a bit too hard to

use. But I was wrong. It's incredibly easy to set up and use. Simply plug it in, fill with hot water, insert a pod, and press the button. In about a minute, you've got a full cup of warm and fragrant foam.

As for how it facilitated the shaving process, I am quite pleased. I've never had much trouble shaving, so I don't feel like it made any significant difference for me in that way. Although, I will admit there's something very classy and timeless about a nice hot shave. That's been a welcome change. Shaving going from strictly a chore to something I actually enjoy. It would be nice if it was a bit smaller to fit on my bathroom sink more permanently.

Short Reviews (>100 words)

#1. Ali Mason - St. Louis, Missouri - 5 Stars

I bought the Moose for my husband, and he loves it! Ever since I picked it up, he can't stop bragging about it to his friends. It's actually getting a little embarrassing lol

#2. Marcus Green - Savannah, Georgia - 5 Stars

Incredible! The Moose is the best! I'll never go back to a basic cold shave again!

#3. Zack Reynolds - Modesto, California - 5 Stars

The shave was great, but what I really loved was the various types of pods available. It's nice to see a company actively working on skincare products catered for acne and sensitive skin. Thanks!!

#4. Henry Grant - Charleston, South Carolina - 5 Stars

This has been a revelation in my daily grooming routine. MooseCare has made shaving a fun and luxurious process! I especially appreciate their smart subscription, so I never have to worry about forgetting to order more pods and running out.

#5. Emma Richmond - Canton, Ohio - 5 Stars

This was a great gift choice for my husband. I originally got it to take with us on vacation, but he loved it so much he now uses it all the time.

#6. Chuck Buskey - Dover, New Jersey - 1 Star

I bought this device to use on my camping trips but was upset to realize there are no battery power options. This made the entire thing pointless for me.

#7. Randy Michaels - Carson City, Nevada - 1 Star

This doesn't fit well on the side of my sink! Also, the cord needs to be a foot longer in order to reach the outlet where I did end up finding space.

Reviews w/ Pro + Con List (100-200 words)

#1. Jack Thompson - Lansing, Michigan - 5 Stars

I love my Moose! There's nothing quite like a hot foam shave on a cold morning. All it took was trying it once at a friend's house for me to go out and get my own. The design is really cool, and I love how quickly it heats up and is ready to use. Not to mention all my jealous guests!

What I love:

1. Is ready in the time it takes to brush my teeth
2. Super cool design
3. The foam is super thick and dense
4. The cup of foam is removable and retains heat nicely
5. The pods fully dissolve, so cleanup is incredibly easy

Downsides:

1. The only possible downside I could see, other than if you have a full beard, is there's no battery functionality, so it needs to be plugged in to use. That said, the removable cup essentially solves that problem.

#2. Mark Foster - Syracuse, New York - 4 Stars

There's a lot to love about this device by MooseCare. As someone who takes his grooming routine very seriously, I was excited to see a product like this ready to hit the market. I think it's a fantastic little device that does everything it says it will and does it well. Let's go over some of my more specific thoughts.

Positives

1. Doesn't need to be plugged in all the time
2. Removable heat-retaining bowl
3. From pod to finished foam in one minute
4. Very high-quality foam that is actually quite warm, above 150 degrees Fahrenheit
5. An environmentally conscious brand offering a variety of pods types
6. Easy to clean/maintain

Negatives

1. Obviously not ideal for those who don't shave
2. No option for battery power
3. Possibly a bit large for some bathrooms

Overall, none of these negatives do much to take away from what is a great device.
