

What Makes Samosa Casino So Special?

Since the advent of the internet, every industry and sector has looked for ways to integrate it into their operations and take advantage of the values it offers — and one of the latest industries to integrate it successfully is the gambling sector. Generally, gambling has been a pastime that many people have enjoyed throughout history, and nothing typifies gambling like a casino.

This multi-billion-pound industry gives people the thrill of winning at the spin of the wheel, roll of the dice, or turn of the card. The excitement of gambling is difficult to understand until one tries it out. With the introduction of online casinos, it is now effortless for people to experience that excitement without ever having to leave the comfort of their home.

What Is An Online Casino?

Online casinos, also called internet or virtual casinos, are computer-based recreations of traditional brick and mortar casinos. The rules that guide brick and mortar casinos also guide online casinos, and most of them offer better payback percentage and odds.

Transparency is what drives the operations of these casinos, which is why most of them publish audits of payout percentage on their websites. Samosa Casino is currently one of the leading online casinos in the United Kingdom, offering its services to other parts of Europe and America as well. There are different types of online casinos, but they all fall into two broad categories based on the kind of software used. They are either download-based or web-based.

For web-based online casinos, the user has to log into the website to play games. Each game is typically represented in a browser plugin, and the player has to use a browser that supports these plugins to play. However, there are also online casinos that let the gamer play games through an HTML interface.

On the other hand, download-based casinos require the user to download an application or software to access the casino before wagering and playing games. This type of online casino offers faster and smoother operation because the sound and graphics programs are in the software instead of loading over the internet each time.

These days, some casinos incorporate both web-based and download-based systems, thereby giving users a range of options as to how they play the game. Many users prefer web-based platforms because they tend to be much safer, but it will require a strong internet connection to enjoy the experience fully. One of the finest examples of a web-based casino today is the revered Samosa Casino.

Games at Samosa Casino

Samosa Casino offers a variety of different types of games for users, providing a wide range of what gamers can play or wager on. The games are provided by top gaming companies and developers, including Amatic, Betsoft Gaming, Evolution Netent, Authentic Gaming, Play'n GO, Wazdan, Quickspin, Pragmatic Play, Red Tiger Gaming, Yggdrasil, and Spinomenal.

Their extensive collection of games to play include;

Slots

There are slot games based on mechanical slot machines which give the user the chance to win big when the player has matching symbols aligned. The slot games work based on the operations of a pseudorandom number generator software which ensures that every spin of the wheel is unpredictable.

This software operates based on a set of algorithms generating a long stream of numbers which reflects true randomness. It meets all the requirements of true randomness and is correctly implemented so that the games are unpredictable and fair. While the player does not see the inner workings of the software, independent regulators audit the casino to make sure the win percentage tallies with the odds given.

Available slot games on Samosa Casino include Gods and Giant, Ages of the God, Peaky Blinders, Demon, Neon City, Buffalo50, Hall of the Mountain King, Spinfinity Man, Northern Sky, Hot Fruits 100, Party Night, Book of Dead, Sugar Pop, Yak Yeti and Roll, Chance Machine 100, and lots more. New games are added to the mix regularly to keep the player excited and the casino more interesting.

Blackjack

Samosa Casino also offers blackjack games for players. This is a fantastic game that people enjoy once they learn the rules and become familiar with the gameplay. Blackjack pits the player against the dealer and other players, in which the player attempts to beat the dealer's hand by reaching or getting as close to 21 as possible.

Available Blackjack games include Pontoon Blackjack, European Blackjack, Sonya Blackjack, 21 Burn Blackjack, American Blackjack, Blackjack Classic, among many others.

Live Gaming

There are also live games on offer at Samosa Casino. These games are streamed live from a studio replicating a brick and mortar casino, or directly from the land-based casino, and give the player the chance to have a completely real-time experience based on real-time results.

Samosa Casino live games also incorporate live chat features that allow players to communicate with other players, and the outcome of the live transactions by the dealer is fed directly to the players. Live games available on Samosa Casino include American Roulette, Baccarat, Auto Roulette, Arabic Roulette, Baccarat Squeeze, Baccarat Live Squeeze, Blackjack Live, and more.

Roulette Games

Roulette is an exhilarating game that many players enjoy both in traditional and online casinos. The player wagers on a single number, groups of numbers, or on the colours black or red. The game is usually a live game where the croupier spins the wheel and tosses the ball in opposite directions, and the pocket of the wheel where the ball falls determines who wins the bet.

Available roulette games on Samosa Casino include Gold Roulette, 24/7 Roulette, Casino Roulette, American Roulette, Auto Roulette, Arabic Roulette, Blaze Live Roulette, Double Ball Roulette, Deutsches Roulette, etc.

Jackpot Games

Samosa Casino also provides jackpot games. They are fun card games that involve an even number of players between two to eight and players have to partner with another player that they will share matching cards with to win.

Available Jackpot games include Dragon Chase, Night in Paris, 5 Lions Gold, different versions of Age of the Gods, Arabian Nights, Bell of Fortune, At the Copa, Real Life, Caishen's Gold, Caishen's Cash, Cats in Vegas, Casino Stud Poker, etc.

Bonuses

One of the most significant selling points of online casinos is the bonuses that they offer. Samosa Casino provides bonuses for new players who just signed up, and there are other forms of rewards as well to encourage players to play more games and have a good time. Since there is a house edge, the bonus is structured in such a way that the player has to bet up to a certain amount before they can make a withdrawal. This is set up to prevent a situation where the player withdraws money immediately after claiming a bonus.

Many online casinos offer a welcome bonus which is a sign-up bonus given on the player's first deposit. It could be structured as a package and can be tied to specific games—for example, a welcome bonus on the first Slot game or the first Jackpot game. There are also instances of special welcome bonuses for members whose initial deposit exceeds the standard limit deposited.

Some even offer a referral bonus in which the referee gets a bonus for signing up with the online casino through a referrer. The referrer also receives a reward after the referee completes specific requirements, like wagering for a stipulated number of times and making their initial deposit.

Perhaps the most common form of bonuses is the no-deposit bonus, also known as phantom or sticky bonuses, which the player can claim without making any deposits. It is usually used by online casinos looking for new players. The no-deposit bonus is usually a non-cashable one, meaning that the player cannot withdraw it. Although the prize will be part of the player's balance, it can only be used to further wager in the online casino.

Comp points are another type of bonus that is offered by online casinos, though it is mostly found in brick and mortar casinos. It gives players a certain amount of points on each wager, which could vary from game to game. Additionally, the points can be converted to money to wager on games.

The types of bonuses available at Samosa Casino include:

Cashback Bonus

Samosa Casino offers 11% cashback bonus on slots. This means the player will get 11% on all their losses in slot games. The prize is paid thrice in a month after every ten days, and there are no limits on how much the player will get back, it all depends on the amount lost in Slot games within that period. This type of bonus is also referred to as insurance bonus, and rewards players for games played, especially the ones that were lost.

There are terms and conditions applicable to these bonuses, including the fact it is restricted to only Slot games. The bonus on losses from Day 1 – 9 of a month are paid on the tenth. The losses from 10 – 19 are paid on the twentieth. While the losses from 20 – 29 are paid on the thirtieth.

There is also a 1x wagering requirement attached to the cashback bonus, and the only players whose account status is active are eligible for the prize. Players from Finland, Greece, Romania, Poland, and South Africa have 5x wagering requirements attached to their cashback bonus.

Daily Reload Bonus

The code to redeem this valuable Bonus is EVERYDAY, and a player can earn up to 100 Euros on daily deposit. Apart from the VIP Free Spins, there are also loyalty free spins. It has a maximum win of 50 EUR/USD; 500 NOK; 75 CAD/NZD; 200 PLN; 6,000 JPY; 3,500 RUB; 4,000 INR; and 20,000 KZT. The maximum win on a VIP free spin is double this amount at 100 EUR/USD; 170 NZD; 150 CAD; 1,000 NOK; 6,800 RUB; 500 PLN; 12,500 JPY; 8,000 INR; and 42,500 KZT.

VIP Points

A player can also get VIP Points for using real money to play any slot games. 1 VIP Point is equivalent to 50 EUR/USD; 75 CAD/NZD; 200 PLN; 500 NOK; 6000 JPY; 3500 RUB; 4000 INR; and 25000 KZT. The VIP points usually determine the player's VIP category and the more points a player gathers, the higher they rise in the ranks. In essence, VIP points are an excellent way to reward players for their dedicated play.

There are six VIP categories with their points benchmark. White lotus requires 200 points; Blue lotus requires 1000 points; Pink lotus requires 5000 points; Red lotus requires 15000 points; Purple lotus requires 20000 points, and Gold lotus requires 35000 points.

Tournament

Samosa Casino also organises tournaments in which players compete with one another to climb the leaderboard and win spectacular prizes. One such tournament is the Biweekly tournament in which the winner earns an award of 450 Euros, the first runner-up earns 300 Euros, and the second runner-up earns 200 Euros. Other top players on the leaderboard also get consolation prizes that range from 150 Euros to 50 Euros.

Overall, there are 15 winners. The tournament games are slots, and the player can choose from the different types of slot games on offer and climb the tournament leader board with points. 1 Euro is equivalent to 1 point.

Safe and Responsible Gaming at Samosa Casino

Due to many stories about gambling addiction, Online Casinos are considered by many to worsen an already severe problem. This is especially important, considering that the current rules and regulations are not comprehensive enough to match the innovative strides of technology we see

today. There are concerns that many people, including minors, could abuse the ease offered by online casinos, and in the process, become addicted to gambling. Unlike brick and mortar casinos which usually require effort to access and where identification is checked before a player can get in, it is much more straightforward with online casinos. All a user needs most times is a device that accesses the internet and a strong internet connection.

This is a significant selling point for online casinos, but it also presents the problem of abuse. To deal with these problems and the risk of abuse, Samosa Casino operates under a responsible gaming policy. Through this policy, the casino protects its players against harmful, excessive, and problem gaming. In line with the British licensing requirements, it ensures that players who have gambling problems are prevented from playing on the online casino. It also created a framework through which players who feel they are excessively gambling can reach out to its support staff for help if needed.

Samosa Casino is operated on the principle that gaming should be fun and entertaining, and be treated as an act of leisure, like going to the swimming pool or visiting the cinema. However, there would always be a few players who end up playing online casino games for the wrong reason, with the wrong mentality, or once they start, they can't stop playing. These players are irresponsible gamers. There are things to look out for that could indicate irresponsible gaming; they include:

- Player relying on gambling as a regular source of income
- Player wagering with money that they can't afford to lose
- Player increasing stakes or playing more to redeem losses
- Playing to get money for essentials, like rent.
- Gaming that affects an aspect of a player's life, relationship, work, etc.

Where any of the above applies to a player, it is necessary to seek help using various measures. Samosa Casino has multiple measures in place for help. It could help players limit their gaming activities and where that is not working, recommend self-exclusion and encourage the players to seek help from independent bodies.

A player can easily limit their play in the account setting. Limits can be set on deposit in which the player can restrict how much they deposit monthly, weekly, or daily. It could also be a loss limit which is calculated solely on the initial deposit and not the winnings. The player can also set a wager limit which restricts how much is wagered or a session limit which restricts the amount of time spent playing the game. Once the limit is set, it starts functioning immediately, and the player cannot lift it anytime they want. A cooling-off period or further confirmation may be required to make any changes.

Players can also take a temporary break from gambling. Samosa allows players to restrict access to their account for between a week and six months. During the period, the player will be unable to play any game, and the online casino ensures they don't receive the promotional offer. This temporary break still gives the player access to their account, but only to withdraw.

However, there is the self-exclude feature which allows players to block access to their account for up to one year. Access to the account is barred until the self-exclude expires and the account is reactivated. There is also permanent self-exclusion, which allows Samosa Casino to block the player's account, refund the amount in it, and close it finally. When a player uses this feature, they can never play at other online casinos or brands that are under the participating licence.

As part of its responsible gaming policy, only players who are up to 18 years can be registered on the online casino. Samosa Casino uses all the technologies and methods available to prevent minors from registering, and they can ask for proof of identity anytime. There are sanctions for children caught registering or playing on the online casino, where they are denied access and have their funds held. Parents and guardians are encouraged to monitor minors to prevent them from accessing online casinos. Software such as Net Nanny, CyberPatrol, GamBlock, and Solid Oak Software can be used and are recommended for this purpose.
