

How well have you slept lately, really?

Neebo can help you get the worry-free rest you need so you'll be bright-eyed and ready to conquer the day.

This one-of-a-kind watch is designed for darlings ages 0-5. It will continuously monitor your child and alert you if your baby needs you, allowing you peace of mind while you sleep, while you drive, and any other time you can't have eyes on your precious little one.

With Bluetooth connectivity, you can check on your child's well-being anytime, anywhere. Neebo continuously monitors and tracks your child's:

- Oxygen Saturation
- Heart rate
- Thermal State
- Activity Level

And will alert you immediately if something is out of the ordinary.

It also features

- Eavesdrop, which allows you to listen to your child whenever you have the urge to check in.

Here's what parents like you are saying:

Laura Jean

"... we received neebo in September of 2018 and in that time neebo has caught 15 episodes of SVT and counting..."

Jackie Pritchard

"We have been able to catch the fevers right as they start and get them under control before they cause their seizures to get worse."

[read more >](#)

Tina Labelle-Joly

"So happy it is home! So quick and simple to setup the device, took 7 minutes between picking it up in the mail box and reading my son's vitals"

[read more >](#)

Cortney Hall

"My son had a silent asthma attack tonight @ the Neebo alerted me. I NEVER HAD THIS PIECE OF MIND BEFORE."

[read more >](#)

Sandy Yancy

"First time in a moving car! Hooray!! This makes me happy. Even though our vehicle has WiFi and baby is perfectly still owlet still wouldn't read in a moving car"

[read more >](#)

Marg O'Callaghan

"We are so happy with our neebo! My daughter doesn't even know it's on, it has given us so much peace of mind"
