

# Well & good

Little things that make life more liveable.

**YEAH BABY, SHE'S GOT IT** Calling all goddesses keeping an eye out for their new favourite piece of jewellery – you might want to have a squiz at Meadowlark's latest collection: Venus. Featuring baroque pearls, grey diamonds, pink and green sapphires and semi-precious stones, each piece is exquisite yet intended to be part of your everyday wardrobe, bringing a touch of fire to even the daggiest get-up. **ONE-TRACK MIND** New brand on the block Harris Tapper does shirts, and boy does it do them well. The high-end, made-in-New-Zealand garments run the gamut from classic to edgy, and designers Sarah Harris and Lauren Tapper will be releasing fresh styles every month. It's fast fashion for those who are hungry for it, but ethically produced. [harristapper.com](http://harristapper.com)

**FLAT OUT** Slide into the new year in these absolute humdingers by St Agni – straight-up rad rattan sandals that go by the name of Hennie. With leather trim and underlay and a non-slip sole, they're made in Java and come in black and tan. [alexandcorban.co.nz](http://alexandcorban.co.nz)

**RHYMES WITH...** From Allbirds comes Smallbirds, a limited-edition kids' range of their award-winning, sustainably made wool sneakers. Even better, each purchase comes with a copy of picture book Sadie Shaves the Day, which co-founder Joey Zwillingler wrote to celebrate the launch and the shenanigans of a brave sheep named Sadie. **PUSH: IT'S REAL GOOD** Get your groove back in the mornings in Nordic style with this handsome Push coffee maker by Muuto. Its stone body, beech-wood knob and gentle curves make it soft to the touch, but its contents will deliver just the jolt you need to get that show on the road. You could also use it for tea, or as a jug for cold drinks. [bauhaus.co.nz](http://bauhaus.co.nz)

**GIVEAWAY!** Thanks to InSinkErator, we're coming in hot with an epic kitchen package for you, valued at \$5000. It includes one of their new Italian-designed MultiTaps (for filtered water of any temperature – see page 129) and tap filters, plus a top-of-the-line Evolution 200 waste disposer (which quietly dispels the myth that tough customers like banana peels and bones can't be crushed), as well as installation.
