

# PROTECTING YOUR PRIVACY WITH TOKEN APP

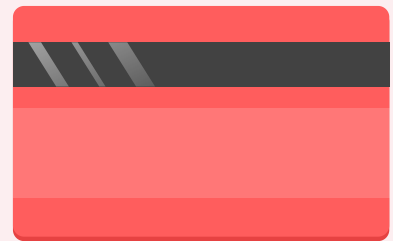

## SECURITY

Token protects your payment identity and eliminates the hassle associated with canceled cards, fraud, theft, or unauthorized charges.

## UNIQUE NUMBER

Generate a unique credit card number ("token") for each merchant that you make online purchases from.

## SUBSCRIPTIONS

Tokens are perfect for recurring payments like Netflix or Spotify. Never worry about accidentally getting charged an extra month!

## ONE-TIME PURCHASES

Create a single-use token for one-time purchases when dealing with vendors you're not too familiar with.

## PHONE ORDERS

Ordering food online? No need to read your real card number out loud. Give the restaurant a token instead.
