Available for **free** on the AppStore and Google Play

### It's Simple

When you make a payment using **Token**, we link the charge to your **protected payment account**. You can link any credit or debit card to Token.

### Universally Accepted

You can connect any US bank account or credit card to generate tokens in seconds for free. Use Token to pay for anything from a pizza over the phone, to your cable bill online with the same convenience as before, but with greater security.

### Also Available on Desktop

Install Token's Chrome extension, pair it with your Token app, and start shopping on your desktop in minutes.

## "To avoid fraud, I use Token. It allows me to freeze payments for specific services when I am not actively using them."

I was on an airplane, once I got off I saw an email confirmation from Postmates at Shake Shack delivered to someone I didn't know. Obviously, my account was compromised, so I changed my password on Postmates immediately. I never want to deal with something like this again. Since I downloaded Token, I use it to pay for services like Uber and Lyft, in order to ensure that I have peace of mind when making online payments. I can freeze and unfreeze my individual Tokens at any time.
