experience **THE 400E**

THE 400A/400XP EVOLUTION - THE 400E

The 400E program gives Beechjet 400A/Hawker 400XP owners a la carte options to upgrade and modernize their airframe bringing them up to the latest technology available for the aircraft. The 400E gives the aircraft a significant useful load increase and upgraded passenger amenities. The completely redesigned interior allows for more comfort with a modern style.

Paired with the G5000, the useful load increases by 350 pounds or more. The G5000 is not just a partial avionics upgrade but a complete replacement of the entire avionics suite including a new Garmin autopilot system. The G5000 instrument panel consist of three 12" LCD displays that provide the pilot and copilot with all the latest technologies including Synthetic Vision, Electronic Charts, XM Weather, WAAS/LPV, ADS-B, Engine Indication and MFD Range Rings.

The completely redesigned interior includes a newly designed shell kit with a recessed headliner creating more headroom. The interior has USB charging ports, redesigned cabinetry and all new LED lighting throughout the cabin.

Paint is to customer specifications. Elliott Aviation's 400E features a two-tone base with upper Platinum Pearl and lower Snow White. The two-tone base is accented with Ruby Metallic and Phantom Gray Metallic, transforming the exterior into a next generation design.

BASE 400E INTERIOR
