

SMOK NOVO 2

The Smok Novo 2 is both an amended and upgraded version of the original Smok Novo.

Smok Novo is a refillable pod system device that has a 2ml capacity which can be filled with the approved quantity of nicotine salt liquids and standard e-liquids. The original Smok Novo pod made a lot of customers dissatisfied because it didn't perform up to expectations. It had operational issues that made customers displeased. This led the makers of the original Smok Novo to recreate the original Smok Novo and also improving the functionality.

The original Smok Novo internal battery comes with a 450mAh capacity while the new Smok Novo 2 has a battery capacity of 800mAh which is almost twice the capacity of the original.

The battery also charges faster than that of the original. The new Smok Novo does not leak like the first and feel of the new Smok Novo is sleek, petite and satisfactory based on customer's reviews.

Moreover, the Smok Novo2 was produced in different exciting colours such as IMF Silver Cobra, IMF Black Cobra, IMF Gold Cobra, IMF Blue Cobra, IMF 7-colour Cobra, IMF Blue cobra and IMF Red Cobra, Black Stabilizing wood, purple stabilizing wood, blue Stabilizing wood, yellow Stabilizing wood, green Stabilizing wood, red Stabilizing wood, brick shell, Tiffany blue shell, gold shell, 7-colour shell, yellow and purple, red and yellow, 7-colour, blue and black, black and white, green and red, blue and brown, purple shell, gold carbon fibre, blue carbon fibre, tiffany blue cobra, black carbon fibre, 7-colour carbon fibre, black cobra, 7-colour cobra, gold cobra, red carbon fibre, red cobra, black 7-colour spray.

Besides, there is a lanyard for Novo 2 with which the device can be worn around the neck as a cool accessory and at the same time to avoid losing or accidentally dropping.

The differences between the Smok Novo 1 starter kit and Smok Novo 2 system specs are indicated below:

The original Smok Novo has a 14.3 × 24.3 × 88.3mm dimension while the Smok Novo 2 has 88 × 24.5 × 14.5mm dimension.

The original Smok Novo has just 10 - 16W Output while Smok Novo 2 has 6-25W Output and 3.0-4.0V power output

Original Smok Novo has protection for short circuit, low voltage, and an 8 second cut off while the Smok Novo 2 has protection for 8 seconds overtime, short circuit, low voltage and bottom Micro USB port.

The Smok Novo 2 has an updated bottom airflow system

Also a Zinc alloy construction

Better battery life i.e 800mAh compared to the original Smok Novo 450mAh.

Novo 2 Components

Mouthpiece

8 seconds cutoffs

Pod

Rubber plug

Low voltage protection

LED indicator

Micro- USB port

The Smok Novo 2 is designed in such a way that it can be easily carried anywhere and everywhere.

With a size of 88.3*24.5*14.5mm, which is obviously on the very small side and it is also very light to make it easy to hold for a long time and you can put it in your pocket or bag and take it anywhere with you.

Taking the lead, the Smok Novo 2 pod has a warranty period of 12 months, which allows you to use it to the fullest for a whole year.

How to Fill Novo 2 With E-liquid

Pull out the pod of the Smok Novo 2

Pull out the rubber plug and add the e-liquid through the slot in the Smok Novo 2

Securely and carefully press the rubber plug.

From improved battery life to versatile pod options, a refined airflow structure, and a gorgeous new look, the Novo 2 steps up as a better alternative to other vaping devices.

Though there are a lot of inventions that may look the same or feel the same as the Smok Novo 2, the Novo 2 stands wholly original and nothing beats original.

The Novo 2 stands out with awesome improvements, including a structure that allows for incredible battery life while sustaining high performance. It is easily charged with the included micro USB cable for go-anywhere vaping.

Whether you're seeking an alternative to traditional tobacco products or you are trying to make the switch from traditional tobacco for the most exciting and intense flavour experience possible, or you want the best way to generate big clouds, the Novo 2 is the best option for you anywhere and everywhere you are.

In short, to be able to maximally utilise the Smok Novo 2, the marketers have advised that new users are to consult the product manual to ensure the smooth operation of the device. Also, users are to be careful with how the pod batteries are handled and be mindful of the kinds of external batteries they purchase to be used for the pod as rechargeable batteries like Lithium-ion polymer, Lithium-ion and others have intense and sensitive battery components. If not handled properly, the batteries might vent or overheat. The batteries must also be stored in containers that are non-conductive. It is also recommended that used batteries should be disposed of at recycling depots.
