

# Winter Craft: Make Your Own Snow Globe

By Erin Vander Weele

Looking for a fun indoor craft to do on a snowy day? Make your own miniature winter wonderland!

## What you'll need:

- Clear plastic snow globe for crafts
- Waterproof glue
- Distilled water
- Vegetable oil
- White glitter (large particles)
- Figurine – Choose a favorite figurine you want to display inside your snow globe.

## Directions:

1. Glue the figurine to the inside of the snow globe lid and let dry.
2. Fill the globe with distilled water, making sure to reserve space for adding the figurine.
3. Add a small drop of vegetable oil to give the glitter a snow falling effect (Be sure to only add a tiny amount to prevent glitter from sticking).
4. Add your preferred amount of glitter for the snow.
5. Screw the lid with the attached figurine back onto the globe.

Shake your snow globe to watch the snow fall and sparkle! Enjoy as a beautiful decoration for the wintery months ahead.
