

## SUMMER CRAFT

# Make Your Own Suncatcher

By Erin Vander Weele

Suncatchers are a perfect craft to do with kids in the summertime. Make your own suncatcher to add a fun and colorful decoration to your windows!

## WHAT YOU'LL NEED:

- Cardstock
- Cellophane (multiple colors)
- Scissors
- Pencil
- Glue stick
- Hole puncher
- Ribbon
- Suction cup with hook

## INSTRUCTIONS:

- 1** Use a pencil to draw your suncatcher shape on the cardstock. You can draw by hand or trace with a stencil.
- 2** Carefully cut out the shape, then use the cutout as a stencil on another sheet of cardstock to make two identical shapes.
- 3** Cut different colored cellophane into rectangle pieces.
- 4** Glue cellophane pieces onto one shape, overlapping as desired.
- 5** Cut any excess cellophane around the shape's edges if needed. Glue other shape over the top.
- 6** Use a hole puncher to cut a hole at the top of your suncatcher. Thread ribbon through the hole and tie a knot.

Hang your suncatcher on a window using a suction cup. Let the sunlight shine through, and enjoy the bright and beautiful colors!
