

Succeeding together in value-based care

Why Imagen's Diagnostics as a Service (DaaS) platform is a win-win-win for patients, providers, and practices in all your payor contracts.

Today's primary care providers are faced with increased workloads, heavy time constraints, and higher expenses that impact the ability to provide high-quality care.

Partnering with Imagen can help you provide top-notch care while managing changes in healthcare, whether you are working with FFS or value-based contracts.

Patient results

Improve compliance and satisfaction as patients don't have to run all over town to get affordable, efficient, and effective imaging.

Provider results

Eliminate unnecessary outside referrals for faster turnaround times and more accurate imaging results in frontline diagnostics.

Practice results

More accurate disease detection, documentation, and management improve risk adjustment accuracy and reduce the potential of missed compensation.

The 10x difference

With our DaaS platform, the value of one X-ray or echocardiogram can be **10x higher¹** in VBC contracts than FFS, thanks to early disease detection.

Illustrative value per exam⁽¹⁾

\$36 Medicare Reimb / Exam

\$371 VBC Value / Exam

10x higher

X-ray

\$212 Medicare Reimb / Exam

\$612 VBC Value / Exam

3x higher

Echocardiography

¹Based on Colorado MAC Medicare rates. Includes VBC value associated with disease burden documentation to enable early intervention, medical expense savings from reduced unnecessary specialist visits and testing, reduced ED visits and hospital admissions, and avoided third-party imaging.

Why not now?

Boost care outcomes and maximize your financial success by improving affordability, accessibility, and effectiveness of treatment. With no upfront costs, your site of care strategy is profitable from day 1.
