

Our REDDI Interns are in the Lab!

Kelly, Manuela and Leo are joining The Taylor Collaboration for the summer as our 2015 [REDDI](#) interns. They are embarking on a three month program that will allow them to develop their engineering and research skills in the field of orthopedics. Manuela is a recent graduate of the University of Delaware, with a degree in Biomedical Engineering. Kelly is a recent Stanford graduate with a B.S. in Biomechanical Engineering. Leo will be heading into his senior year as a Mechanical Engineering major at UC Berkeley in the fall.

Take a look at our [Facebook](#) page for more about their day to day duties at Taylor!

YAMS to Stop by the Taylor Lab

The [Taylor Collaboration](#) is gearing up to host students in the Youth Ambitions in Medical Sciences program later this month. The [YAMS](#) program is a chance for high school students to explore the day to day routines of medical professionals. Robin, Junior R&D Engineer, looks forward to this program every year as 'an opportunity to expose young people to how engineers and clinicians can collaborate to advance medical technology.'

Building Relationships

Jeremi, Director, as well as other members of the Taylor team, recently went to Stanford to discuss the details of a Bay Area Biomechanics Consortium with Stanford, UCSF and other prominent institutions.

Stay up to date with The Taylor Collaboration by checking the [news](#) section of our website.

The Taylor Collaboration is on Social Media

The Taylor Collaboration is on [Facebook](#), [Twitter](#), [LinkedIn](#) and [YouTube](#)! Subscribe to our accounts for updates and pictures from the lab.

Surgical Training Courses

We have recently hosted surgical training courses with companies such as City Surgical and Exactech, Inc. in the Taylor labs.

[Book a surgical training course today.](#) These sessions are a great forum for residents to learn through surgical simulation and gain hands-on experience in a learning environment.
