## The Season's Colour

Every season has its defining fashion colour, and this season is all about white, specifically monochromatic white. It has numerous denotations, representing light and innocence and creating a chill and cold sense.

Vogue Greece fashion editor at large, Katsanis, shared her views on the colour of the season and how to style it. "I love pairing monochromatic looks together, especially an all-white ensemble, whether it be an all-white suit or a dress," says Katsanis when it comes to styling monochromatic white outfits, Katsanis advice in pairing it with accessories. "Adding a bit of architectural metal whether it's simple gold hoop earrings ala Jennifer fisher or one earring such as a pearl earring or a single statement earring." A gold or silvered coloured earring would be better, according to Katsanis.

Egyptian hijabi fashion blogger Heba Nafea shared her styling secrets for women who choose to wear a headscarf. "Wearing a monochromatic white outfit could be tricky as not every white piece that is worn together works, so it's better to use different textures to create separation between the top & the bottom. So I always add to monochromatic white outfit nude scarf, gold jewellery to illuminate the outfit and nude bag & shoes," says Nafea.

You can shop this trend from department stores like Saks or Bergdorf Goodman and designer brands like Chloe, Proenza Schouler, or Bloomingdale's.
