Did you know that you're already behind your competitors if you haven't applied IoT in your manufacturing operation?

As we're moving into the mid-quarter 2020, we expect to see more and more manufacturers adopt technologies for Industry 4.0 and IoT continues to be a steady investment.

According to the PwC's 2019 Internet of Things Survey, 93% manufacturers are optimistic about IoT, believing its benefits exceed its risks. In fact, 68% plan to increase their investment over the next two years.

Trade pact a boon to SMEs aiming to grow globally

But many small firms here still unclear about the treaty's benefits, say business leaders

Singapore

Some may scoff at it. Small firm's fully online to track their more competitive overseas markets, where the small Singapore firm has no foothold in. But a landmark trade deal set to take effect on Dec. 30 may give small and medium firms like her a fighting chance when they expand abroad.

Trade pact, easier access to other countries' markets and the right to

Mr. Samuel Tan (left), co-founder and chief executive officer of Auk Industries, which makes industrial productivity tracking systems, posing with his team (right) for a photo.

On Wednesday, the pact crossed the majority threshold needed to bring it into effect when Australia withdrew.

In addition, five of the other 10 CPTPP members have ratified it - namely, Mexico, Japan, Singapore, New Zealand and Canada. The rest

data centers were in no danger of several countries, for instance, Mr. Tan. It may only need one. The treaty would remove rules that force businesses to place data servers in individual markets to do no harm customers there.

Mr. Tan, Auk Industries, makes

many are unfamiliar with the trade agreement," said Mr. Tan.

The business, since 1985, may be aware of the tariff reduction that would mean that not the other parts of the treaty that could also be a boon - such as the ability to bid for government tenders in the other CPTPP countries, he said.

Singapore Business Federation (SBF) chief executive officer, Mr. Ming Kit, agreed it was important to help firms understand how the CPTPP benefits can be realized and translated into tangible gains. He added that the SBF is currently reaching out to business chambers to raise awareness of the CPTPP.

A Ministry of Trade and Industry spokesman said it, too, is working with government agencies and trade associations to engage companies through outreach sessions and seminars. While Enterprise Singapore and the Economic Development Board will continue to help firms access and establish supply chains overseas, including in CPTPP markets.

"The open and rule-based multilateral trading system has benefited economies, big and small, and is especially important to an economy like Singapore, which is small, open and heavily dependent on trade," said the spokesman.

Mr. Tan, chairman, president of the Australian Chambers of Commerce in Singapore, said the CPTPP's goal of reducing barriers and promoting of fair international trade encourages growth for all involved.

"Trade with other CPTPP members continues to grow by more than 10 per cent of Singapore's exports. So

Our CEO, Samuel Tan was interviewed by Lianhe Zaobao at the 2020 Budget Business Forum with Deputy Prime Minister Heng Swee Keat to share his views on the business strategy and market opportunities in ASEAN as a base to explore the global market.

Auk Industries has been addressing the focus to maximize the implementation of our hardware and software solution to gain a foothold in China and Southeast Asia, then across the world.

Through constant improvement, Auk Industries has now managed to enter Indonesia, Malaysia, Thailand, Vietnam and Europe, Italy.

According to Samuel, the local advantage across the surrounding countries compared to Singapore lies in the independence of engineering personnel for the lower technological advancement—These engineers often have to rely on their way to solve a problem. However, Auk Industries' solution can now assist in determining problems and bottleneck's to improve manufacturers' production efficiency.

It's an honor for us to have Deputy Prime Minister of Singapore Heng Swee Keat shared our client success story in the Parliament regarding Singapore's FY2020 Budget Statement on 18 Feb 2020 in Singapore, as mentioned in The Straits Times.

Back in 2018, Container Printers began to digitalize with our solution and supervisor Paramesvaran Subramaniam is delighted to have more confidence and control in his job by being able to utilize real-time data to address production, machine and manpower issues more efficiently.

Amy Chung as Chief Executive of Container Printers also added that transformation was necessary to stay relevant.

Check out our client's success story here: <https://lnkd.in/ffcsmdN>

How will your factory keep up with Industry 4.0 development?

As a result of the outbreak of COVID-19, many sectors around the world have been severely affected, including manufacturers. This crisis reminds us that Industry 4.0 is more relevant to the future than ever before.

According to The Manufacturer, the role of Industry 4.0, from today onwards, will be shifting to:

- 1) Help make sure that more companies can sustain better when a crisis occurs
- 2) Shorten the recovery phase and help return businesses to normal operations as soon as possible
- 3) Provide the platform to develop new, more resilient businesses in the medium to long term

The adoption of Industry 4.0 and with its roles could greatly reduce the impact of the COVID-19 outbreak on us all.

Now is the time we should be thinking about how we can leverage technologies rather than retreating away from them.

We are always available to help you to digitalize. Learn how you can move forward through challenging times with us at <https://auk.industries>
