

NOEL MILLER

JOURNALIST

ABOUT

I am a professional writer looking for a creative job that is engaging and gives a voice to a local community. Telling stories is vital to building trust with a community and keeping information accessible. Storytelling in both creative and newswriting has been my passion since college. During my first year, as a journalist, I won a two first-place place Keystone Media Awards for enterprise reporting in the environmental beat about issues surrounding a local landfill and a conflict of interest regarding a York City Official.
