RHYME

RHYME is designed as a reminder that everything we do in the universe is in resonance and harmony to the environment. Rhyme is a collaborative work in the form of a kinetic art installation combining 2 elements of technology; mechatronic & robotic movements. A breakthrough in Indonesia's art installation.

Synchronization of these elements results in a rhythmic movement of kinetic installations supported by sounds and light architecture. This installation can transform and become a stage for a LIVE kinetic musical performance.

SEMBILAN MATAHARI is an international award winning interdisciplinary design studio from Indonesia, committed to creating inspiring and innovative audio-visual and technology artworks.

instagram.com/nmworld

The digital era demands us to move fast and think faster. Due to the recent outbreak, we need to distance ourselves from each other.

Interaction, even a touch, becomes a rare thing. Something we need to be grateful for being able to do, all this time. Now, is the time of our lives where for once, we can pause to contemplate. To listen to the universe that is telling us to self-reflect. To be grateful. To heal and be healed.

We're here to contribute in any way that we can to mend the damage we've made to mother earth.

To be together in spirits for all humankind & break the chain of [#COVID19](#). Kala Kini Nanti looks forward to interact with everyone again, right after the outbreak passes. Stay Healthy everyone!

To live is to grow.
To create is to innovate.
To exist is to adapt.
The future might not be easy,
But the pandemic unites us still.
Together, we can break the chain.
Together, we'll continue our journey.
To enlighten the obscurity.
To brighten the society.

We are grateful and humbled to have an
incredible support from all of you.
Here's to our 13 years of growth, and to our
brighter years ahead!
