

BURNERINDO
TEKNIK UTAMA

**Burner & Steam Boiler Sparepart Specialist
Supreme Quality For Excellence in Performance**

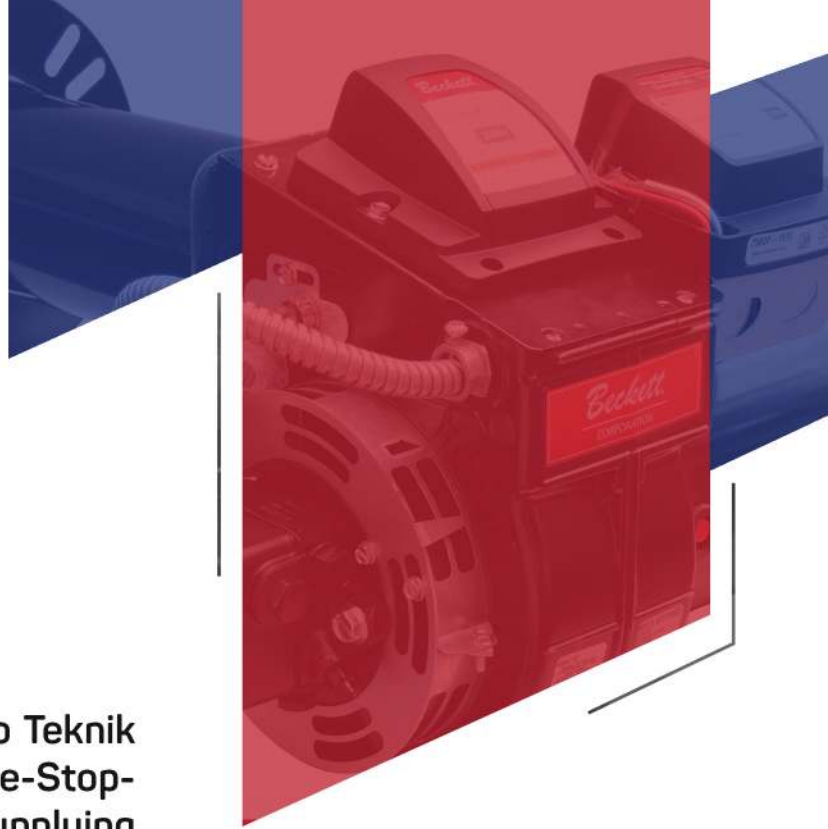

About Us

Company Overview

Incorporated in 2015, PT. Burnerindo Teknik Utama is established as a One-Stop-SparePart-Solution, particularly in supplying the spare parts for burners and steam boilers. We prioritize in providing top quality and genuine spare parts for all types and brands of burner and steam boilers, such as :Weishaupt, Riello, FBR, Siemens, Suntec, Dungs, Danfoss, Satronic / Honeywell, Krom Schroder, Elster, Brahma, Giuliani Anello, Coprim, Madas, Steinen, Monarch, RMG, Gestra, Mobrey.

In our business, we are able to offer the best and most competitive prices compared to other suppliers as we maintain direct and solid business relations with worldwide suppliers and partners. We also deliver the best technical service that is supported by a team of highly trained and experienced professionals who are always ready to answer your business needs.

Lastly, we always aim for collective customer satisfaction through our international standard and high-quality customer service. The combination of all these business values is the foundation that sets forth our commitment and passion in the industry.

Vision

To become the leading engineering company specializing in all kinds of burners and technical parts, including steam boilers' in Indonesia.

Mission

- To answer the challenge of in-stock demands at the most critical time and by customers' requests.
- To maintain business relationship with our well-established partners in order to achieve price excellence
- To continue to provide full customer support through all lines of business, including top technicians, sales and customer care.

Message from *Director*

Since our inception in 2015, PT. Burnerindo Teknik Utama has progressed from a burner and spray booth oven technician to a multifaceted company dealing with a comprehensive spare parts for steam boiler, burner, valves and other technical equipment & instruments.

It has always been our commitment to deliver quality products and services with competitive pricing and excellent after sales care. We aim beyond total customer contribution by also conducting Good Corporate Governance which entails fairness, transparency, accountability and responsibility.

We believe that by upholding professionalism and proper business management, the values of our company will extend to our customers, stakeholders, business partners, personal resources, and most importantly, to our society at large.

BURNERINDO
TEKNIK UTAMA

Good Corporate Governance

As a part of our business commitment, our company takes serious efforts in our daily operational, management and standard practice. With Good Corporate Governance, we prioritize the following values for the benefit of every elements involved :

Fairness

Our fairness policy covers every aspect of our management and customer service. We treat each personnel with the similar respect to boost morale and high work efficiency. Similarly, we apply fairness to all our customers as we respect all business opportunities in equality.

Transparency

Company transparency helps bring together a good teamwork and solid work performance. We welcome clients to understand our work process and for stakeholders to evaluate our overall performance, including financial, at any given period.

Accountability

As our company grows, we apply a leadership system that values accountability for actions, products and business decision. Each personnel holds important role and acts in accordance with our business values for the sake of company's success

Responsibility

We strive to be a good part of community members by practicing safe work procedures, proper waste management, and constant business improvements. We believe that our company will only fully develop through the support of our surrounding elements, thus our goal to provide them the same care.

FBR

BURNERS MADE IN ITALY

Since 1969, FBR has designed and manufactured high-tech burners for industrial and civil applications.

We develop the REAL made in Italy: our burners are completely made in Italy and all the components are selected exclusively from the best European producers. The rigorous controls carried out in our factories guarantee the absolute quality of the results.

At Burnerindo, you can find FBR burner units and spareparts.

– **weishaupt** –

Burners founded Weishaupt's reputation for uncompromising quality. Their efficiency and reliability are held in great esteem the world over.

Weishaupt was founded in 1932 and now has about 3400 employees and is a market leader for burners, Condensing boilers, heat pumps, solar energy and building automation.

Other than the burner unit, we also carry Weishaupt spareparts in Burnerindo.

Beckett

CORPORATION

Located in North Ridgeville, Ohio, R.W. Beckett is the North American market leader in combustion products used in heating, cleaning equipment, and for custom applications. Developers of electronic safety controls and sellers of HVAC related products, the Beckett Family of Companies has a presence in more than 50 million US homes.

Burnerindo sells burner units and spareparts from Beckett brand.

RIELLO

WORLD LEADER IN BURNER PRODUCTION

Riello is a world leader in the production and sale of burners for residential, commercial and industrial applications. The Riello world includes air conditioning systems and technologies for any environment.

The Strength of Riello is a combination of excellence of technological innovation and experience acquired over time, accompanied by the reliability of a team of technicians, professionals and employees, called upon daily to provide their contribution in terms of hard work, skill and creativity.

At Burnerindo, we sell spareparts for all types of Riello burner, such as Burner Control. Photocell, Oil Pump, Solenoid Valve Gas etc. We can also supply Riello burner units, based on request.

STEINEN

Steinen is one of the leading manufacturers of stainless steel oil burner and industrial spray nozzles. Key customers include well known and respected manufacturers and distributors throughout the world. With a history of over 100 years of market leadership and superior customer focus we strive for excellence in all that we undertake.

We carry Steinen Nozzle from size 0.50 to 28.00 GPH with 45° and 60° Spray Angles and Type S and SS Spray Patterns.

Danfoss

Danfoss's skilled experts have developed a wide range of the best oil burner components. The goal was to approve the process of monitoring and controlling while expanding their application on a domestic and commercial level. The focus - to achieve actual energy efficiency.

At Burnerindo, we sell Danfoss Oil Pump, Ignition Transformer and oil nozzle, as well as burner control etc.

SUNTEC designs, manufactures and markets an unrivalled range of gear pumps and accessories.

Partner of the largest heating system manufacturers (domestic burners, industrial boilers, mobile heating units and heating systems for vehicles), SUNTEC also offers technical solutions for all applications using a gear pump (high pressure cleaners, exhaust gas treatment, hydraulic systems,...)

The quality, reliability and performance of its products have always enabled SUNTEC to offer innovative and pioneering products on the market.

At Burnerindo, we sell a variety of Suntec products from Low, Medium to High capacity. Additionally, we also carry their accessories and sparepart for Suntec products

Fluidics
Instruments

Fluidics Instruments B.V. was established in 1977 and since then is showing a steady growth. The company is specialized in development and manufacturing of atomizers, nozzles, burnerlances and related products for oil burners. To achieve an optimal technical solution together with the customer, our engineering team likes to be involved in an early stage of development.

At Burnerindo, we sell Fluidics nozzle atomizers type WE from size 40kg/h to 800kg/h at 50° angle and type W1 from size 20kg/h to 800kg/h at 50° angle.

DUNGS[®]
Combustion Controls

DUNGS is a synonym for safe and clean gas combustion. In close cooperation with our clients we develop and manufacture innovative system solutions for the thermal and process heating industry and gas engines.

Dungs products are used in almost all types of gas burners such as Weishaupt, Riello, Saacke, Ariston Thermo, FBR, Oilon and others. It is also common to find Dungs products in Gas Engine such as GE Jenbacher, Caterpillar etc.

At Burnerindo, we sell Dungs products including, Gas Filter, Gas Multiblock, Solenoid Valves, Double Solenoid Valves, Gas Regulator, Pressure Switch and more.

SIEMENS

Industrial burners are the heart of every thermal process-based production line, and the quality of the final product depends primarily on the burner's reliability and performance. Low maintenance effort and maximum availability, high levels of energy efficiency and seamless integration into existing automation systems are the key requirements placed on advanced firing systems. Using decades of experience, know-how and commitment in the field of firing systems, Siemens has become a key partner for manufacturers of high quality thermoprocessing equipment.

SIEMENS comprehensive products range includes burner controls, actuators, flame detectors, sensors, control systems, gas valves, testing equipment and system solutions.

Siemens products that are available at Burnerindo include : burner controls, actuators, flame detectors, sensors, control systems, gas valve, testing equipment and system solutions.

Honeywell satronic

Honeywell brand commercial combustion products provide solutions for HVAC and burner and boiler control systems including programmers and primaries, valves and actuators, limits and pressure controls.

Honeywell products consist of Honeywell US and Honeywell Europe (EMEA) For Honeywell US, Burnerindo carries Burner & Boiler Controls (including Flame Amplifiers, Flame Sensors, Gas Valves, Probes, Pressure switches etc) , Firing Rate Motors & Linkages, Flame Detectors (Flame Rod, Infrared, Ultraviolet) and Ignition Transformers plus accessories.

As for Honeywell Europe products, in addition to the Honeywell brand, we also have Satronic and we sell all its Burner Controls, UV / Flame Detectors / Photocell, Ignition Transformers, Gas Air Ratio Controllers, Valve Proofing Systems, Pressure Regulators & Gas Filters, Gas & Air Pressure Switches, Servo Motors, and Gas Valves plus the accessories from both brands

Honeywell

krom schroder

Honeywell Kromschroder manufactures gas combustion and controls for heating and process applications from filters and regulators, to safety shut-off and control valves, to the burner management system.

From Krom Schroder, Burnerindo sells Gas Filter, Pressure Regulator, Pressure Switches, Combination Controls, Automatic Burner Controls, Flame Detectors, Ignition and Sensing Electrodes, Ignition Transformers, UV Sensors.

Honeywell

elster

For over 150 years, Elster-Instromet has had a major bearing on developments in gas measuring and control equipment. Innovation, quality and safety provide the basis for success. And each of these three features is still just as important today.

Energy measuring systems, ultrasonic measuring systems, electronic volume correction, modern data call-up and evaluation systems as well as automated remote meter reading have extended the classic product range for time-tested measuring and control equipment.

Elster-Instromet is consistently working on the advanced development of its products and is a leader in setting new standards and advancing the state of the art.

At Burnerindo, we sell Elster products such as Diaphragm Gas Meters, Turbine Gas meters & Quantometers.

MADAS®

The gas devices demand, born from the Italian gasification in 1974, produced the conditions to let our company to rise.

The founder, together with his family and with a well motivated collaborators team, began a path which is giving continuous satisfactions.

All the products are certified and the reference rules represent the minimum standard.

Madas is working with almost all the countries in the world where the gas is used.

The continuous research together with even more performing and competitive products making allowed us to supply very demanding customers, which belong to different sectors. Our product attachment, the customer respect and the owners' and all collaborators humility are moods ever grown in Madas.

We sell Madas products : Gas Pressure Regulators, Gas Filters etc.

"Quality and reliability of tradition technology of the future"

Giuliani Anello is the Watts brand dedicated to the production of:

- Accessories for domestic and industrial burners of diesel oil, fuel oil, and gas
- Vacuum pump filter and stainless steel water filtering cartridges
- Oil and gas safely systems

This brand, present in the filtration and hydrocarbons field since 1962, has joined the Watts Group in 2003.

From this brand, Burnerindo carries Strainer and Oil Filters, Gas and Air Filters, Gas Governors / Regulators, Slam Shut-Off Relief Valves, Air-Gas Ratio Control Valves and Compensation Joints.

In 1956 Brahma starts in Legnago, Verona, the production of components for burners. Two years later, the first automatic flame control devices were introduced into the heating market.

Towards the end of the 1960s, with the development in Italy of diesel oil burners, Brahma expands its market acquiring customers of primary importance.

In the '70s the range of Brahma products expanded to include complete lines of appliances and components for oil and gas burners, able to satisfy any type of application required by the market.

At Burnerindo, we sell Brahma Burner Controls, Gas Solenoid Valves, Flame Sensors and Ignition Transformers.

Italpump was founded in 1985 by Mr. Iginio Patuzzo who, thanks to his knowledge and expertise in the field of burner pumps, decided to build pumps with its own brand.

The company, at the beginning operated in the Italian market, increase, step by step, his range of products and today can offer to his customers a complete choice.

Italpump actually compete with other well known manufactures offering quality and capability. Today we compete and export our products in different markets worldwide.

At Burnerindo, we carry Italpump products particularly for Gas Regulator, Gas Filter, Gas Solenoid Valve, etc.

The company was founded in 1974 with the aim to apply state-of-the-art technology to the production of transformers for the ignition of gas and oil burners. The application of technology this has revolutionized the production techniques for the insulation of high voltages.

The improvements achieved – in comparison with the previous art – concern the durability, the electrical and mechanical features and the environmental impact of the materials used in production. The company has constantly grown and has invested most of its resources in the search of trail-blazing solutions, both in terms of materials and equipment.

The research and cooperation with suppliers for the development of materials, enabled the creation – in 1987 – of a low-cost, small-size transformer with the same features as conventional transformers, called "Series E". This range of products has resulted a great leap forward in applications that called for very small sizes and very low costs. This range is still the least expensive ignition system of all.

The same technology was later applied to obtain the greatest power from a transformer of this class, called "Series G". These transformers can meet all ignition requirements of large-size burners when high power with continuous duty cycle is required.

From COFI, Burnerindo sells ignition transformer for TRS series, TRE series, TRK series etc

The company was founded by Hartwig Paulsen in 1970 as an engineering office in Karlsruhe. The first task was to give advice and Projecting active in heating technology. It is very quickly able to set up its own manufacturing and to begin the production of industrial pumps and components for heating and for plant engineering. Since care was taken by the management from the beginning to careful handling of orders and the highest quality for its products, as well as to the purchased components, the company hp-TECHNIK received very quickly a high reputation for quality and timeliness.

From this brand, Burnerindo is selling Internal gear pumps and speciality pumps for oil burners, oil industry, mechanical engineering, shipbuilding and many other branches of industry.

As a partner for measuring systems in the fields of water supply, thermal energy and data management, Aquametro develops new products together with the customer, optimizes existing systems, supports initial operation and offers the service that is desirable.

A Versatile flow meter for oil, heavy oil and many other oil-like liquids. It is used for efficient consumption measurement of heat burners and various combustion engines. A reliable solution for any application where oil is consumed.

From Aquametro, we sell Contoil Oil which is the oil flowmeter for Fuel Measurement Burners application.

SAUTER's products are distinguished by Swiss quality and cover the four areas: Systems, Components, Services and Facility Management. Together, they stand for the all-round expertise of the company: SAUTER creates sustainable environments.

SAUTER can provide impressive references in the following sectors: office and administration buildings, research and education facilities, hospitals, industry and laboratory buildings, airports and railway stations, and leisure centres and hotels.

At Burnerindo, we primarily carry all Pressure Switches products from Sauter.

Allanson International, based in Toronto, Canada is a leader in bringing technology and engineering together to provide innovative solutions for customers in sign lighting, HVAC and consumer packaged goods markets. Through its process management, manufacturing expertise, and technologies, Allanson has designed innovative electrical products since 1926. These products include: high output fluorescent ballasts, high intensity discharge ballasts, transformers, and power supplies for neon and LED signage, as well as oil heating ignition transformers for residential and industrial applications.

From Allanson, Burnerindo sells Ignition Transformers for USA burners.

CLESSE INDUSTRIES designs, manufactures and supplies worldwide, products for LP Gas (Butane-Propane), Natural Gas, Biogas and Synthetic Natural Gas installations.

Our product range is focused on gas regulators, valves, fittings and safety accessories, to be installed on networks, tanks, cylinders and pipes.

They are marketed under the highly renowned brands: CLESSE and NOVACOMET

With more than 60 years of experience, and at the forefront of innovation and development, Clesse Industries is widely recognized as the reference for quality and for reliability to the professionals in the Gas Industry, and serves with dedicated solutions :

- Gas installers
- Gas distributors
- Specialised gas equipment distributors
- General heating and plumbing wholesalers
- Industrial users of gas
- OEM appliance manufacturers

At Burnerindo, we sell its Gas Regulator and Ball Valve.

Westwood Products Inc. was founded in 1965. The company started in Sayreville, NJ and had operations in Perth Amboy, NJ between 1970 and 1993 , and relocated to South River, NJ in 1993 and currently has production facilities there.

The company began by manufacturing electrodes for oil burners and its product line has grown rapidly. The company is now the leading supplier to the industry for products ranging from electrodes, ignition terminals, oil filtration, burner test equipment, oil treatment products, oil de-aerators, brazed plate heat exchangers and much more.

We carry all Westwood's Electrodes and Ignitions terminals along with other burner equipment.

COPRIM - Italy

Coprim is a firm specialized in production of methane and lpg equipments.

The products for exercise and safety of pressure equipment are manufactured in according with European directive PED (Pressure Equipment Directive) and are certified by ISPEL with total quality guarantee.

From COPRIM, Burnerindo sells Gas Regulator type ALFA series.

Fluid Control Division Parker is responsible for the design and manufacture of innovative solenoid valve solutions. Our products are engineered for a wide range of applications and markets, from manufacturing to medical to transportation.

With our modular concept of valves, coils and electrical components. Parker Fluid Control Division can help you achieve greater flexibility of your inventory and work-in-progress by limiting overstock.

Our innovative lab testing ensures high standards on pressure, flow, environmental vibration and media compatibility for superior application specific results. We are the leader in fluid control technologies.

Improving process flow and plant automation

The Parker Fluid Control family diverse range of products includes Skinner Valve™, Gold Ring™, Sinclair Collins®, Lucifer®, and Jackes Evans™.

Burnerindo sells Parker Solenoid Valve from Parker Lucifer and Parker Hannifin applicable for oil, steam, hot water etc.

Klinger is an established top leader for sealing, fluid control and fluid monitoring solutions. The company was founded in 1886 as a family business and is known as a pioneer in sealing technology.

KLINGER is the only company worldwide that produces both valves and sealing materials combined in one group.

At Burnerindo, we sell KLINGER Gauge Glasses (Transparent, Reflex and Circular) and Liquid Level Gauges for steam application.

McDonnell & Miller

a xylem brand

McDonnell & Miller, a unit of ITT Industries, is a leader in engineering and manufacturing boiler controls, liquid level controls, low-water cutoffs, and flow switches for steam and hot water boilers in industrial, commercial, and building trade applications. McDonnell & Miller specializes particularly in boiler controls and power switches.

Burnerindo sells Low Water Cut-Offs, Flow Switches, etc from McDonnell & Miller brand.

GESTRA is a global leader in the design and production of valves and control systems for heat and process fluid control. For Gestra Brand, Burnerindo sells Steam Traps, Check Valves, Control Valves, Safety Valves, Strainers, Stop Valves, Steam Boiler Equipment, Level Electrodes, Level Controller, Blowdown Valves etc.

mobrey

The selection of the correct Level Switch in each application is critical, which is why Mobrey offers a choice of technologies and products, including the original Mobrey float operated liquid level switches, vibrating fork liquid level switches and ultrasonic gap sensors and switches.

Mobrey also has a complete range of continuous liquid level control products and technologies including ultrasonic non-contact, microwave radar, hydrostatic, displacer & submersible level transmitters, and self powered contents & magnetic level gauges with outputs including 4-20mA, HART, fieldbus communications and local relay control.

From Mobrey brand, we sell boiler water level controls such as Vertical Air Break Controls, Modulating Water Level Controls and Sequencing Blowdown Valves.

Steam is our passion.

Measurement and control systems have been developed, produced and installed worldwide for over 90 years with the IGEMA trademark.

We offer you a complete range of technologies and products for the safe and economical operation of your plant. In particular in the steam and condensate sector. We take care of both the modernisation of steam boilers, that are equipped with mature mechanical technology, and of new plants that operate with innovative, future-orientated electronic solutions. IGEMA products are used everywhere where steam energy is generated and processed for industrial manufacture. Our strength lies in the area of installations with high pressures and temperatures.

Among our clientele are both original equipment manufacturers from the plant construction industry, planning companies and also operators of steam boilers in a variety of different sectors such as e.g.: power stations, refineries, chemical companies, paper mills, food manufacturers, sugar producers, tyre manufacturers, shipping companies, breweries, hospitals.

We sell IGEMA Water Level Gauges, Level Switches, Electronic Boiler Monitoring and Controlling etc.

Industry specialist

VYC industrial s.a. was founded in Terrassa, Barcelona, (Spain) at the beginning of the century, in 1914 at the height of the Catalan textile industry.

At first we specialized in heating, but the emerging textile industry needed companies specializing in steam and our knowledge of boilers meant we were well placed to exploit this market. We started as installers, but as the company became more technically proficient we established ourselves as manufacturers of steam boilers and textile machinery.

In manufacturing our boilers we used components that were difficult to find in the national market and difficult to import. We overcame this difficulty by manufacturing valves, pressure gauges and other components for our own use. Over time, we built up a manufacturing programme that was sufficiently attractive to be marketed separately, and thus our current valve manufacturing began.

Our origins were with steam, and that has enabled us to become recognized specialists with a closely related valve manufacturing programme:

- Safety_Check_Steam traps
- Reducing_Mixing_Float-buoys
- Instrumentation_Bleeding for steam boilers
- Automatic level controller
- Level indicator-sight glasses

At Burnerindo, VYC products involve safety valve for steam boiler type 496 AP, either PN 16 or PN 40.

ZETKAMA is one of the largest manufacturers of industrial valves in Central and Eastern Europe with own cast iron foundry. The company is offering over 2000 of different types of valves, such as stop valves, check valves, bellow valves, safety valve, butterfly valves, strainers, ball valves and other. The products are sold to more than 70 countries around the world.

From ZETKAMA brand, Burnerindo sells Stop/Globe Valves, Bellow Valves, Strainers and Check Valves

RMG Messtechnik GmbH

RMG Messtechnik GmbH is your global partner in the gas business. RMG has more than 150 years of experience in the natural gas industry. We offer you expertise along the entire gas supply chain. Our market-leading products, systems and services support you for all applications in the measurement of natural gas. We guarantee you reliable and highly accurate measuring technology with international approvals for fiscal metering and gas analysis. For the planning of your system, you benefit from tailor-made systems and our experiences gained in this industrial sector.

At Burnerindo, we sell RMG Gas Flowmeter type TRZ 03-K and TERZ 94.

Xylem Inc., incorporated on May 4, 2011, is a water technology company. The Company designs, manufactures and services engineered solutions across a range of critical applications. The Company is an equipment and service provider for water and wastewater applications with a portfolio of products and services addressing the cycle of water, from collection, distribution and use to the return of water to the environment. The Company has three business segments: Water Infrastructure, Applied Water and Sensus.

. The Company's portfolio of solutions addresses customer needs across the water cycle, from the delivery and use of drinking water to the collection and treatment of wastewater to the return of water to the environment. The Company's applications in the areas of water equipment industry include transport, treatment, test, building services, industrial processing and irrigation. The Company sells its products in various countries through a distribution network consisting of direct sales force and independent channel partners.

The Sensus segment's products include metering, networked communications, measurement and control technologies, software and services, including cloud-based analytics, remote monitoring and data management. Sensus develops technology solutions that enable use and conservation of water and energy resources. The Sensus segment delivers communications, metering, measurement and control technologies and services that allow customers to use their distribution networks for the delivery of critical resources, such as water, electricity and natural gas. Additionally, it sells software and services, including cloud-based analytics, remote monitoring and data management, as well as lighting products and solutions. Its brands include Sensus and Smith Blair.

The Company competes with Itron, Badger Meter, Landys & Gyr, Roper and Honeywell.

At Burnerindo, we carry Sensus water meter type WP-Dynamic , WP-QF , Meistream etc and MBUS-Reading system, Data Logger etc

We -SUCHY MESSTECHNIK -, want to offer our clientele modern measuring instruments for pressure and temperature based on a high quality, a suitable price-service-ratio and being available in short times of delivery. At the same time, our company shall be a working and living place where our employees can fully develop their skills for the advantage of our customers.

One of our strengths is the client-orientation in all our services, with a strong technical competence and supplying measuring instruments with a high quality and a wide flexibility to react to customers' requests immediately.

From Suchy, Burnerindo provides Pressure Gauges, Chemical Seals, Thermometer, Pressure and Temperature Sensor etc.

FANAL – switching, protection and control.

FANAL low-voltage switchgear has had an excellent reputation for reliability and durability for more than 80 years and is used in plants and installations throughout the world. We provide competent advice on all available FANAL products and can ship them at short notice to customers throughout the world. To replace products discontinued some time ago, we stock equivalent products supplied by various other manufacturers.

Apart from pressure switches, level switches, thermostats, contactors, timer and monitoring relays and motor circuit breakers, we offer a full range of controls and indicators, terminal strips, electronic interfaces, installation units and explosionproof switchgear.

At Burnerindo, we sell Fanal Pressure Switches in various types.

WIKA is a global market leader in pressure, temperature and level measurement technology. Working together with our customers, we develop comprehensive solutions based on our high-quality measurement technology components, with the solutions ultimately being integrated in their business processes.

We deliver 50 million quality products to over 100 countries every year. Worldwide, approximately 600 million WIKA measuring instruments are in use.

From WIKA brand, Burnerindo sells pressure and temperature gauges in a variety of types and sizes.

Production processes are becoming ever more complex. So it's really important that the measurement technology used to control and monitor the processes is all the more understandable and intuitive. VEGA has set itself the goal of developing innovative measurement technology that is easy to install and operate and offers maximum safety and reliability.

At Burnerindo, we sell Vega Level Measurement Sensors and Level Switches products.

Why Us?

Services

We have built a reputation of being a reliable, quick and efficient service on all calls of duty. Supported by a complete range of spare parts for burners and steam boilers in stock, our team of highly trained and qualified technicians are ready to undertake repairs and service at timely manner to avoid lost production cost or time.

Quality

The standard quality in our company applies not only from the reputable brands of spare parts that we work with, but also displayed in the quality and experienced technicians who understand basic repair to complete overhaul. Furthermore, our customer care also reflects the professionalism that our clients deserve in their business.

Stock

Having worked closely with highly reputable partners who are top providers for world's burner and steam boilers demand, we are able to supply any accessory or spare part in stock to customer requirements promptly.

Pricing

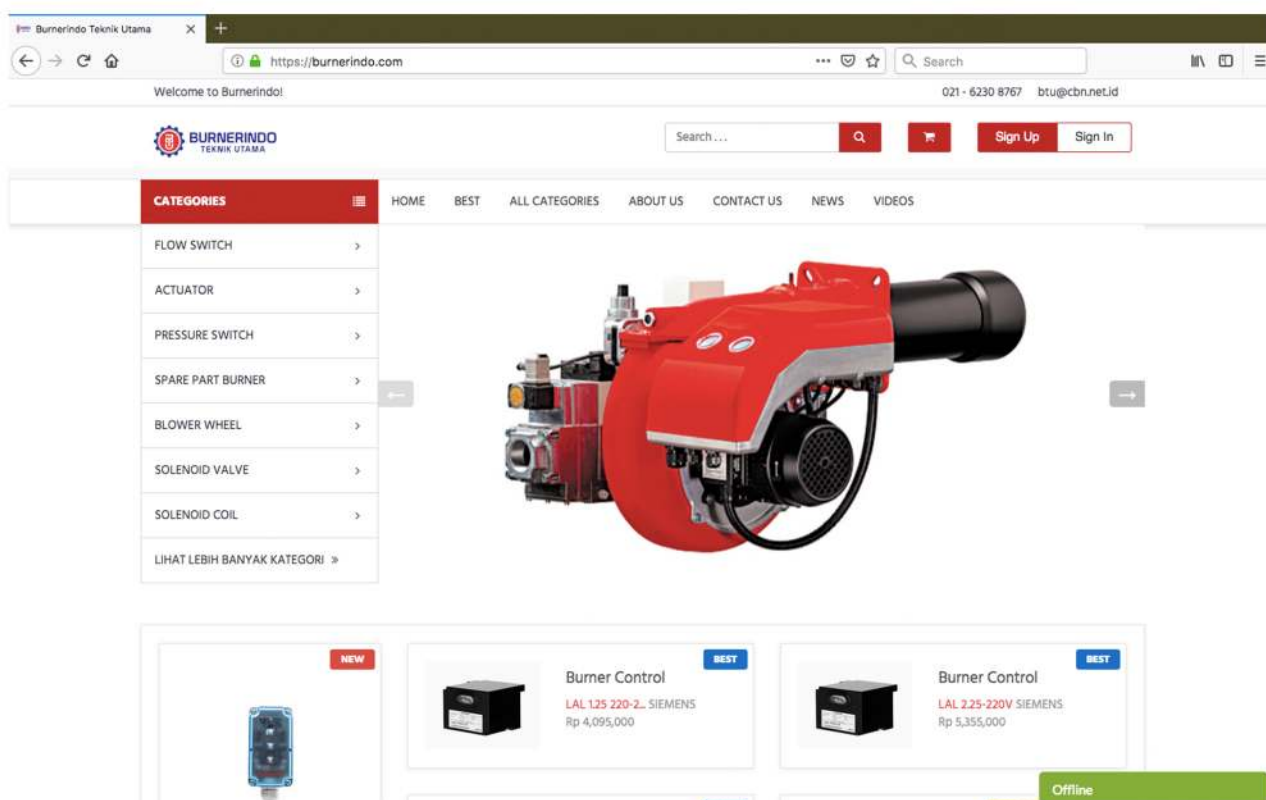

Our competitive pricing is a result of diligence in building a solid business relationship with our supportive partners, enabling us to supply all spare parts at an economical and competitive rate.

Customer Satisfaction

We provide services advantages through our specialized skills and technical adaptability. With the most advanced tools and techniques, our technicians are able to work professionally as your case demands. We strive for your full satisfaction, as regard your business as our very own.
