

Porsche Engine Repair

Do you feel like your Porsche is running a little rough recently? The acceleration off the line is underwhelming or sluggish? Are you seeing excessive smoke from the tailpipe, or hearing tapping or knocking noises? These may be signs your engine is in need of repair. No need to worry, though. At Garth's Import Service in Kernersville, NC, we have the tools and expertise to get your Porsche running like a dream again. Since 2008, we have proudly served the surrounding area with our outstanding. Our team of ASE-certified technicians have over three decades of experience, and can handle any challenge your Porsche throws at them. We pride ourselves in providing the most accurate, and quality work possible. Our facility, located in the heart of the triad, is state-of-the-art with the latest in diagnostic tools. When your Porsche enters our shop, know that our staff carries the same you do for your vehicle.

A Straight-Forward Professional Repair

We very well know the complexities of maintaining Porsche cars and SUVs. It is our mission to give you peace of mind as we repair your engine and its components. Now, the most common problems are the Coolant Reservoir, Rear Main Seal, and Oil Separator issues. Our team will do a complete work-up if they suspect one of these issues have occurred. Once our technician has finished their diagnosis, they'll inform our service advisors. Our service team will then write a comprehensive repair plan for your Porsche. We'll work hand in hand with you to determine the best course of action. Once we have agreed to the plan, our technician will set out with their repair. They utilize the latest in tools and repair practices to ensure the highest work is done to your vehicle. For those of you who have air-cooled Porsches, fear not. We welcome your classic Porsche to our shop. Our team has a great understanding of classic Porsche engineering and welcomes your classic 911s, from the F-Body to the 993. We even cover the 912 and 914.

No Substitute For Satisfaction

We at Garth's Import Service do a complete and thorough check of your Porsche's components once we're done with the repair. After which, we'll write a long-term health plan on how to best care for your Porsche's engine in the future. When you come to pick it up, our Service Advisors will talk you through the plan and scheduling of your next visit. If you have any questions about Porsche engine repair, or want to schedule an appointment, feel free to call us at (336)-555-8970, or text us at 336-555-6303. Our state-of-the-art facility is located on 118 W. Hill St in Kernersville, NC. We're sandwiched in between Greensboro and Winston-Salem, and just north of High Point. We look forward to seeing you at our shop, and experiencing a shop like no other.
