With her husband away and her assistant out of reach, Lilly begins to feel their absence when trouble arrives.

While juggling patients, Lilly provides treatment for an ornery friend who has a serious illness, mentors

her younger sister, and uncovers a town mystery. A host of strong female characters emerge who rely on faith, prayer and each other to get through tough times.

Set in 1911, this adventure makes a pilgrimage through innovation. The beta-versions of telephones, fingerprint collection, indoor plumbing, chemical hair straighteners and even autos are revealed.

Watson's feisty, comedic and opinionated characters bring life to her fiction.
