# Mobile app development services

Hey, We are 7SkySolution! Jetpack with experience in creating high performance, digitally transformative and feature-packed indigenous mobile applications for Android and iOS devices
Providing you dynamic UI/UX..

WE UNDERSTAND WHAT YOU'RE LOOKING FOR

We offer native mobile apps produced on iOS, Android and **cross-platform/hybrid** development on Cordova/PhoneGap, Xamarin, and React Native. Our business analysts help you decide on the platforms to target and choose a suitable development framework.

That's why when you get an app developed, it's essential you're using a team of experienced developers and genius designers, who don't take shortcuts, and together create an extremely functional and elegant application. So, here at 7SkySolutions we focus on quality design and development, making sure of performance and quality, which means that you can relax and know that you'll get app that your audience is going to remember.

We develop apps for both the iOS (iPhone and iPad) and Android platforms. Our iPhone developers can develop iPhone applications for Social Networking, Sports, Utilities, Travel, Weather or any other niche.

If you'd like to know more, feel free to take a look at our portfolio. You'll see that we have a great deal of experience in application development, ranging from games to web-based services.

Mobile app types we focus on

We create mobile applications of any complexity for B2C and B2B use cases. Our clients come from many different industries. We can built up specific knowledge and expertise in creating applications for the following niches.

- **Taxi**

We choose the most workable technology stack and integrations like payment gateways and geolocation for robust, stable working apps with smooth UX/UI. Like uber/careem/bykea.

- **Banking**

  For mobile banking sphere, we create user-centric applications with uncompromised security, and privacy in mind.

- Booking

We help businesses like tour operators solve common issues that include overbooking, hassle with booking shifts, and lack of customer self-service with our automated booking solutions.

- Delivery

  Last mile delivery is one of the most expensive parts in the on-demand industry. We build apps that help you increase the efficiency of your business, cut costs, and automate all delivery processes.

- Ecommerce

  Having worked with multiple clients from ecommerce field, we've developed our own white-label solutions that efficiently speed up development time and cut costs.

- Streaming

  We solve common streaming apps issues with the appropriate technologies and app architectures designed to resist high load of content and ensure streaming with no delays.

Make 7SkySolution Your Partner Today!

- # Fitness

  When developing fitness apps, we focus on data integrity and privacy,

  hardware and software integrations, and user engagement to accomplish

  business goals and keep users satisfied.

- # Telemedicine
  Our telemedicine apps solve the significant problems people face in brick and
  mortar clinics, such as long response time, immobility of medical records, and
  insecure data storage.
