

## How To Attract Good Luck?

Who on earth will reject to know the secret to attract Good Luck? After all, it's divine, sacred, and irrational—something which is unfairly dispersed between the people. Many of us see Good Luck as inexplicable yet self-experimenting. However, British psychologist Professor Richard Wiseman comes up with the Good Luck elixir riding the white horse.

According to his research under the heading of 'THE LUCK FACTOR,' luck is not something pre-written. It results from a positive and optimistic attitude and thinking. He reveals that every person has the magic of attracting good luck, but few recognize.

### **4 Principles to Attract Good Luck**

He squeezed his study of 10 years unveiling the attitudes that attract good luck. There are four simple principles to become extraordinarily lucky.

#### **1. Take Off The Anxiety-Spectacles**

Firstly, unchain yourself from the anxiety. Too much worrying about the future makes you blind to life-changing opportunities. Once you take off your anxiety spectacles, you can see many changes around waiting for you.

#### **2. Let Your Inner Friend Speak**

Be confident and faithful towards your inner voice. Stop suppressing your inner voice in the name of ridiculously overthinking. Usually, people think following intuitions especially without any concrete logic, will make them embarrassingly odd one.

#### **3. Prefer Day On The Night**

Always look to the bright side of the scenario. Expose yourself to the rays of optimism. It helps you feel good about yourself and nurture your self-esteem. It is the core principle to attract good luck.

#### **4. Re-Bounce Power**

Last but not least, believe in your re-bouncing power. You can only attract Good luck by not giving up on it. Yes! Good Luck pretends to be hard-to-get but admires consistency. All you need to be is resilient.
