5. Recore Mattress

Features:

- Great responsiveness
- Sleeps relatively cool
- 4 layers of memory foam
- Medium firm
- 120-night sleep trial
- 15-year warranty

The Recore Mattress features a simple design that is made up of four layers of memory foam, latex, and polyfoam. The mattress has a special transition layer of gel-infused memory foam which gives it a slow response to pressure. The graphite and gel-infused layer make the mattress sleep cool.

Sleepers who fall in the average weight would find the Recore a delight as it provides a balanced-body cushioning and overall support. The mattress provides excellent spinal alignment, support, and stability. The 7" high-density polyfoam, which is the firmest layer of the bed gives great support for sleepers that are in the heavy-weight range.

6. Brunswick Mattress

Features:

- Medium Firm
- 120-night sleep trial
- 15-year warranty
- Temperature neutrality
- Strong edge support
- Pressure point relief
- Spinal alignment

The mattress is suitable for sleepers in the heavyweight range who prefer thicker mattresses. With a layer of gel memory foam, polyfoam, and poly fiber layer, the Brunswick provides comfort for sleepers.

Temperature neutrality is maintained throughout the night due to the strong airflow. This is due to the coil layer used in the foam construction as well as the cooling gel infused into the foam layout. This makes Brunswick ideal for a hot sleeper.

9. Juno Mattress

Features:

- Medium Firm
- 120-night sleep trial
- 15-year warranty
- Even, consistent support
- Very affordable

The Juno Mattress is a medium firm all-foam mattress that appeals to side sleepers. The mattress possesses a touch of coziness due to its stretchy knit feel. Memory foam used in the construction of Juno mattress gives a bit sinking into it due to the slow response to pressure.

The firmness of the polyfoam serves as a support for the sink that affects the memory foam. The layer construction makes the bed to have a softer feel touch. This feature makes it ideal for contouring and pressure relief.

10. Polysleep Mattress

Features:

- Memory foam
- Medium firm
- 100-night sleep trials
- 10-year limited warranty

The Polysleep mattress is designed, manufactured and assembled in Montréal. The mattress construction combines soft memory foam and high density polyfoam to give a deep pressure relief.

Polysleep mattress makes for a breathable structure and sleep cool due to the perforated too comfort layer used in the design. It is also made up of water-repellent cover. The mattress provides an excellent sleep comfort.

Mattress Types

Mattress comes in different types based on the material used in their construction. The common mattress types include:

- **Memory Foam.** This mattress type gives a hugging and oftentimes sinking feel. It is suitable for people who require good pressure relief. As for the setbacks, it oftentimes has a slight off-gassing and tends to sleep hot. It also doesn't offer a good edge support.
- **Innerspring.** Innerspring mattresses give a supportive and bouncy feel. They prevent the sinking feel and allow sleepers to float. They are relatively cheap but don't have a really long lifespan. Innersprings don't sleep hot but can give a noisy sound because of the squeaky metal components.
- **Latex.** Latex mattresses are great for their natural origin. It provides excellent support, good conforming and it is responsive. Latex mattress is noiseless, sleeps cool, and great at motion isolation. However, latex mattresses tend to be on the high price and also offer an average edge support.
- **Hybrid.** The hybrid mattress is a combination of the other mattress types, (sometimes just two, sometimes all three). Though hybrid mattresses are quite expensive, there is a perfect mattress for almost everyone.

5 Major Factors to Consider before Choosing a Mattress

Now that you know about the best mattresses made in Canada, let us examine the major factors to consider before you choose a mattress.

1. Size:

Choosing a size of mattress depends on the amount of space you have in your room, the number of sleep companions (kids and pets) and your preferences. The basic sizes of mattress include twin, full, double, queen, king, California king.

Therefore, before you make the decision on which size of mattress to buy, consider the amount of space that would be available in the room after you include the mattress and other furniture. The number of sleeping companions you have and your preference for larger beds should form your buying decision.

2. Comfort Level/Firmness

Mattresses are available in different levels of firmness which determines the level of comfort you get. Ranging from firm to plush, choice of mattress firmness is based on your sleeping position, weight and preference.

For instance, firmness preference for a stomach sleeper would be quite different from that of a side sleeper. In the same manner, what a sleeper in the lightweight range will consider too firm may be soft for a sleeper in the heavyweight range.

3. Temperature

Do you wake amidst sleep due to heat? If you naturally heat up during sleep, it is best to choose a mattress with an excellent temperature neutrality and sleep cool. .

While most mattresses might make you warmer all through the night, specific mattresses with cooling features help to regulate the temperature and ensure you have a quality sleep.

4. Pain

If you experience pain at pressure points, such as the hips, the shoulder, lower back, etc, you need to choose a mattress that would offer pressure points relief.

For example, if you have lower back pain, you may need a firmer mattress to help keep your back aligned. It is therefore better you identify any pain you have before going to buy a mattress. Knowing the pressure points and areas where you feel pain will help you choose a mattress that will alleviate these pains and improve your sleep.

5. Budget

No one launches into the sea without proper preparation. Though coming last, this is a very vital factor to be considered before you choose a mattress. You won't want to buy a mattress with all the bucks you saved.

Therefore, it is important to make out your budget and find a mattress that can offer value for your money. There are mattresses that fall within the low-price points and offer a great value for their amount.
