Would you like to save your favorite TikTok content to view later? Are you worried about backing up your social media accounts?

Well, allow us to introduce you to [Qoob Clips](#). Qoob Clips offers a powerful TikTok mass downloader that lets you save content from your favorite public and private social media accounts, including your own. Today, we'll show you how you can keep your social media content with this great app.

## What Is Qoob Clips?

Almost everyone loves TikTok these days. If you're not scoping out hilarious viral videos or following your favorite celebrities on these platforms, then you're probably making content to increase your follower count. But, while TikTok is known for keeping you entertained, sometimes it's hard to find your favorite content from your For You page after you viewed it.

Wouldn't it be better if you could just click a button and save content from both public and private accounts? Even better, wouldn't it be awesome if you could browse these accounts without any ads?

You know how annoying ads are, but since TikTok is free, the company offsets costs using these in-line advertisements. Unfortunately, they interrupt the content that you want to see.

That's where Qoob Clips comes in. Qoob Clips solves both these problems with a single desktop app. The software will let you save all your content in one place, and it enables you to view that content ad-free.

**Download:** Qoob Clips for [Windows](#) | [macOS](#) | [Linux](#)

## How Does Qoob Clips Work?

Think of Qoob Clips as an alternative to the feed on your mobile device. In the [Qoob Clips](#) browser, input the account or hashtag you want to view, and you can download the content from those places.

You can also download content in bulk, rather than downloading videos one at a time by using TikTok's in-app download button.

The best part is there are no ads to interrupt your scrolling. Plus, the Qoob app is designed for your desktop, so you can view content while at your computer and not just while you're using a mobile device.

## How to Save TikTok Videos With Qoob Clips

There are only a few steps to use Qoob Clips. They are:

1. First, [download and install the software](#) from the Qoob Clips website. Launch Qoob Clips.
2. Next, enter the TikTok username or hashtag into the **search bar**. Click the **Download** button to download the account's content.

Finally, you'll see the content populate in Qoob Clips. Click on the clip you want to watch, or right-click to locate the content on your hard drive.

## Get More From TikTok With Qoob Clips

Qoob Clips is free to try and [offers a subscription](#) for those who want to download a lot of content. The free app limits you to two feeds, but you can add more depending on which subscription tier you choose.

For most users, the \$30/month option will be the best. While that might seem expensive at first, for around \$1 per day, we think eliminating ads makes the cost worth it.

Qoob Clips lets you save your favorite content, and ultimately enjoy your TikTok experience even more.

We hope you like the items we recommend and discuss! MUO has affiliate and sponsored partnerships, so we receive a share of the revenue from some of your purchases. This won't affect the price you pay and helps us offer the best product recommendations.
