Energy saving tips for electricity and/or gas customers

- ✓ Turn off lights whenever you leave a room.
- ✓ Replace your incandescent light bulbs with ENERGY STAR® LEDs which use up to 90% less energy and last up to 25 times longer.
- ✓ Turn off the tap when you shave or brush your teeth.
- ✓ Set your hot water heater at 120 degrees Fahrenheit.
- ✓ Clean your dryer's lint filter after each load, and clean the outside vent regularly.
- ✓ Replace washers on leaky faucets. A steady drip can add up to many gallons wasted every month.
