

WHAT IS TEM?

Technology Expense Management (TEM) allows enterprises to take control of their global IT spend and associated inventories across telecom, mobile and cloud.

DID YOU KNOW?

THE TEM LANDSCAPE continues to grow and evolve, driven by the use of video, cloud services, mobility, IoT, consumption-based services and digitalization.

AND IT is delivered as a service, not just via software.

Core offerings of TEM are **BILLING ANALYSIS, STABILITY, PROCUREMENT, AND PROVISIONING.**

DID YOU KNOW?

60%

TEM can help companies save up to **60%** annually on technology expenses.

Large enterprises make up about **two-thirds** of TEM users due to complex national and international expense management requirements.

TEM LEADER TANGOE manages more than **\$40 billion** in technology expenses across **10 million** global technology assets and **\$2 billion** in managed payments.

DID YOU KNOW?

Many companies struggle to rein in their global IT spend and lack in-house expertise and scale. TEM vendors are a cost-efficient solution.

And the landscape is only getting more complicated... By 2025, there will be close to **40 billion** connected devices driving businesses.

MACHINE LEARNING AND AI

help reduce invoice processing time **by days**. Some providers have invested in these capabilities to make TEM more accurate and efficient.
