

UBIQUITOUS ENERGY BROILERPLATE + ONE-LINER

ABOUT:

[Ubiquitous Energy](#) is the world leader in transparent photovoltaics working towards a goal of dramatically reducing the carbon footprint of buildings—the planet’s biggest energy consumers. The Ubiquitous Energy patented technology is the world’s first aesthetically acceptable, electricity-generating alternative to traditional windows. The coating harvests solar energy and serves as an invisible, onboard source of electricity for greater energy efficiency. Originally created from the minds of students at MIT, Ubiquitous Energy is now producing its highly transparent, efficient solar cells in a production facility in Silicon Valley. For more information, visit www.ubiquitous.energy or follow us on [Twitter/Facebook](#) @UbiquitousEnergy and connect via [LinkedIn](#) @ubiquitous-energy-inc-.

ONE LINER

[Ubiquitous Energy](#), the world leader in transparent photovoltaics producing the first aesthetically acceptable, electricity-generating alternative to traditional windows.
