

We want to see how FastMed can help you.

We welcome you to a **FREE** trial of our services.

What does my free trial include?

Your trial will include:

- A physical exam created around your healthcare concerns.
- Customized education on diet and exercise.
- Individualized care plans.
- Longer appointments to address all your healthcare concerns.

Your first visit will be a virtual visit where your doctor will review your health story, lifestyle, and personal health goals. You will then follow up with an in-person physical exam and allow the healthcare team to collect any necessary labs and diagnostic testing. Your doctor will review your results on your last appointment, explain your diagnosis, offer you individualized education, and navigate you to the next steps of your healthcare journey.

Prescriptions, additional imaging, and labs beyond the free trial package are not included. Your doctor may advise you to complete further testing according to your health history, assessment, and health goals. With a 20-40% discount on labs and medications, we work to pass the savings down to you, offering you price transparency every step of the way.

After your trial is over, we welcome you to activate your wellness plan and join one of our memberships. FastMed is here to partner with you, empowering you to prioritize your health and wellness.

Why Choose FastMed?

We believe FastMed should be the first stop in your healthcare journey; it's where you turn for guidance and support before you get sick before you see a specialist and before you end up in the hospital.

FastMed combines best-in-class customer service with the highest quality clinical standards to bring you primary care that is simple, convenient, and personalized.
