To Whom It May Concern:

As a recent graduate of the Dental Hygiene Program at Coastal Carolina Community College, I am thrilled to begin the next chapter on my journey in this exciting field. The past two years of schooling have given me the unique opportunity to grow not only as a competent clinician, but as a member of what I've discovered to be a passionate and caring community dedicated to overall wellness through oral healthcare. It is this same enthusiasm and dedication for dental well-being that I look forward to imparting on my patients. In addition to my eagerness to make an impact on the community in this field, I also offer skills such as:

- Proficiency in EagleSoft software
- Familiarity with Guided Biofilm Therapy (GBT, including Airflow and Piezon)
- Ultrasonic scaling
- Subgingival medicaments

I would be my pleasure to share more about my qualifications at a time that best suits you.

Yours sincerely,

Tyler Alford, RDH
