Injectables

Cosmetic injections are our specialty at PURE Medical Spa. Our Medical Director, Julie Acarregui has been named as one of the Nation's top cosmetic injection experts. Julie travels nationwide as a National Clinical Educator for Galderma, where she teaches

the art of cosmetic injections. All of Julie's team members at PURE have been personally trained by her. You can rest assured that your choice of wrinkle relaxer will be performed by an expert in the field.

BOTOX® & Dysport®

Botox and Dysport Botox® and Dysport® are neurotoxin injectable treatments that are the most effective way to temporarily improve the appearance of wrinkles caused by repeated facial expressions like smiling, squinting, or frowning. Results are excellent in all age groups, softening existing lines and preventing new lines from forming. During your initial consultation at our Boise, Sun Valley or Coeur d'Alene office, we will evaluate your wrinkles and determine an injection plan that best meets your goals.

Both are quick, easy and painless treatment options with results lasting for several months. These injectables can be used for wrinkles and fine lines in the forehead, frown lines, around the eyes (crow's feet), around the lips ("lip flip"), on the side of the nose (bunny nose), for marionette lines near the mouth and in the chin to correct dimpling.

Dermal Fillers

\$725

Dermal Filler
Member Price

Replenishing lost volume for a fresh, more youthful appearance is safe and easy thanks to today's dermal fillers. At PURE, our clients love dermal filler because they offer natural-looking results that fill depleted facial features, ease wrinkles and stimulate collagen.

Dermal fillers gently plump and lift the skin to treat volume loss caused by your body's natural aging process. Fillers are perfect for plumping wrinkles, lines and scars. Most of today's dermal fillers are 100% natural. Certain dermal fillers are developed to address certain cosmetic concerns, for optimal, long-lasting results. During your initial consultation at our Boise, Sun Valley or Coeur d'Alene office, we will discuss your goals and create a filler treatment plan tailored to you.

Dermal fillers like Juvéderm® & Restylane® use a PURE natural substance called hyaluronic acid. Hyaluronic acid is a chemical found in every cell in your body. Since Dermal fillers are injected into the deep layers of your facial tissue, they can smooth the appearance of moderate wrinkles and replace lost tissue volume. Dermal fillers replicate the body's own hyaluronic production to provide fullness in the areas they are injected.

At PURE Medical Spa, our highly trained team specialize in Advanced dermal Filler injections techniques that can reduce wrinkles, smooth "parentheses" or "smile lines" on the sides of the nose and mouth, enhance cheekbones, decrease under-eye circles, smooth out the jawline, enhance thin or asymmetrical lips and correct lip lines.

Sculptra®

PURE is readily known as Idaho's Leading Sculptra Expert.

Sculptra is the only FDA-approved facial injectable treatment on the market that helps boost the skin's own natural collagen production to help treat the underlying cause of aging - the loss of collagen. In doing so, it subtly and gradually adds volume that lifts the soft tissue and tightens the skin from within.

This gradual approach can lead to more natural-looking results than traditional fillers, which can sometimes appear overfilled or artificial. Sculptra is used to restore facial volume and provide

support to the skin to improve the look of smile lines (called nasolabial folds), Marionette lines, preauricular wrinkles (the vertical wrinkles in front of the ears), radial cheeks folds (vertical wrinkles on the low cheeks) and chin wrinkles.

Sculptra can be injected anywhere on the body to cause tightening and lifting of the skin. At PURE Medical Spa in Boise, We specialize in using Sculptra for butt lifts, smoothing cellulite, lifting sagging knees, tightening sagging arms and softening fine lines on the chest and décolleté. It is often used as a longer-lasting alternative to other fillers, with results lasting up to two years or more.

KYBELLA®

\$825
Kybella Treatment
Member Price

Kybella is an FDA-approved injectable treatment that is used to reduce submental fat, also known as a “double chin.” It contains a synthetic form of deoxycholic acid, a substance that is naturally produced by the body to help break down and absorb dietary fat.

When Kybella is injected into the submental fat, it destroys the fat cells, which are then naturally eliminated by the body over the course of several weeks. The treatment is typically administered in a series of two to four sessions, spaced several weeks apart, and results in a more defined jawline and a reduction in the appearance of a double chin.

Hair Restoration

Are you looking for a way to restore your hair to its former glory? If so, you may have heard of Platelet-Rich Fibrin (PRF). This is a cutting-edge treatment from PURE Medical Spa that uses the patient's own blood to stimulate hair growth. This hair restoration technique is backed by plenty of scientific research.

Studies show PRF is an effective treatment for hair loss in both men and women. It has also been used to treat alopecia, a condition which causes baldness. In short, if you are looking for an effective and natural way to restore your hair, PRF therapy may be the answer. It is safe, non-invasive, and has impressive, proven results.

Laser Skin Rejuvenation

Skin rejuvenation is a term used to describe a variety of non-surgical cosmetic treatments and procedures designed to improve the appearance of the skin, reduce signs of aging, and restore a more youthful and refreshed look.

Forever Young BBL™ Photofacial

PURE Medical Spa clients love the Forever Young BBL™ Photofacial when it comes to reducing the appearance of skin discoloration, wrinkles and fines for more even and smoother skin. This non-invasive cosmetic procedure uses advanced light technology to penetrate deep into the skin's tissue to stimulate collagen production.

At PURE, we customize this treatment to best suit each client's needs. The Team at PURE has been performing The Forever Young BBL Protocol longer than any other Medical Spa

in the State of Idaho. It is truly one of our specialties. This protocol utilizes multiple passes and a variety of filters to not only address sun-damage and vascularity, but to also reverse aging and improve wrinkles and texture.

A landmark research study by Stanford University, shows that after Forever Young treatments, genes are actually re-arranged as they were when they were younger! Forever Young is a fantastic age management tool to be done on an ongoing basis.

MicroLaser Peel

At PURE, the MicroLaser Peel is a cosmetic procedure that utilizes a specific laser to resurface the skin. We customize the depth of treatment for each client to ensure optimal results for each client.

Our Microlaser Peel utilizes a scanning erbium laser to remove the outer layers of your skin in a safe, precise manner. The dead skin cells are then replaced by healthy cells, improving the texture and clarity of the skin.

Pro-Fractional Laser

ProFractional is a laser procedure used to dramatically improve the overall appearance of your skin including wrinkles, scars, tone and texture. ProFractional uses a laser microbeam to treat thousands of pinpoint areas of the skin.

Because only a fraction of the skin is directly treated with the laser, healing time is accelerated, and downtime is reduced. You may experience some pinpoint bleeding and 2-4 days of redness and/or peeling with this procedure depending on the depth of the treatment. We may recommend anywhere from 1-5 treatments depending on your skin and schedule.

Contour Laser Resurfacing

Contour laser resurfacing is an effective cosmetic procedure that uses laser technology to improve the appearance of the skin with wonderful results. During the treatment, a laser is used to safely remove the outer layer of the skin, stimulating collagen production and promoting the growth of new, healthy skin cells.

By removing the outer layer of the skin, this treatment improves the texture and tone of the skin, reducing the appearance of acne scars, sun damage and other skin imperfections like hyperpigmentation and dullness.

Laser Hair Removal

Laser Hair Removal

Laser hair removal works by using a specialized laser device to target and destroy the hair follicles in the treated area for smooth, supple skin. The procedure is non-invasive, meaning it does not require any incisions or injections.

During the treatment, the laser emits a concentrated beam of light that is absorbed by the pigment (melanin) in the hair follicle. The heat from the laser damages the follicle, which inhibits future hair growth.

Body Contouring

Explore non-surgical body contouring at PURE to get the slim silhouette you desire without loose or sagging skin.

CoolSculpting®

CoolSculpting is a non-invasive cosmetic treatment designed to reduce stubborn fat in certain areas of the body that is most effective for people who have small pockets of fat that are resistant to diet and exercise. It uses a process called cryolipolysis, which freezes and destroys fat cells without damaging surrounding tissues.

During a CoolSculpting session, a special device is used to apply controlled cooling to the targeted area of the body. This cooling freezes the fat cells, which then undergo a natural cell death process called apoptosis. Over time, the body naturally eliminates these dead fat cells, resulting in a reduction in the amount of fat in the treated area.

Thermiva
Member Pricing

ThermiVa from PURE Medical Spa is a revolutionary device that helps improve symptoms associated with vaginal laxity, urinary incontinence, and more. It uses radiofrequency energy to gently heat the skin tissue in order to contract it and stimulate production of collagen and elastin.

This leads to renewed skin elasticity and tight vagina walls, as well as restoring the cushiony softness of the tissue. The procedure is non-invasive and incredibly effective, offering lasting results for up to one year after your three treatments.

Skin Tightening

RF Microneedling

RF microneedling is a revolutionary non surgical cosmetic treatment that utilizes very small “micro” needles that penetrate to the depth of our choosing and release radio frequency energy. These micro-needles, combined with the radio frequency energy, signals the skin to create new collagen. RF Microneedling treatments have minor discomfort with minimal downtime.

This skin rejuvenation treatment improves skin texture and tone, tightens loose skin, eases

hyperpigmentation and gives skin a more plump, youthful appearance. RF microneedling treatments are also ideal for acne scars, stretch marks, and enlarged pores.

RF Microneedling is safe on all skin colors and tanned skin. During your initial consultation at our Boise, Sun Valley or Coeur d’Alene office, we will evaluate your skin and medical history to determine a personalized treatment plan for you.

Sylfirm X RF Microneedling

By combining RF energy and microneedling, Sylfirm X RF Microneedling provides dual benefits to our clients. The advanced SYLFIRM X system uses Pulsed Waves & NA effect in combination to deliver RF energy and select thermal coagulation to damaged skin cells.

The bi-polar non-insulated gold needles penetrate the tissue at an exact depth of 300 microns, giving you extra effectiveness while preserving skin health. This treatment from PURE Medical Spa provides natural looking results with minimal discomfort and can be used to reduce wrinkles, improve skin tone and texture, minimize pore size, and smooth scars.

At PURE, our Medical Corrective Chemical Peels help to improve the overall appearance and texture of the skin, reduce the appearance of fine lines and wrinkles, acne and even out skin tone.

A peel treatment involves the application of a chemical solution to the skin to exfoliate and remove the outermost layers of dead skin cells. The strength and type of chemical peel used will vary depending on the individual's skin type, concerns and desired results.

Dermaplaning

Dermaplaning is a non-invasive cosmetic treatment that involves using a sterile surgical scalpel to gently scrape away dead skin cells and fine hair or “peach fuzz,” from the surface of the skin. This process helps to exfoliate the skin and improve its texture and appearance, leaving it looking smoother, brighter, and more radiant.

Dermaplaning can also help to improve the penetration of skincare products, making them more effective, as well as reduce the appearance of fine lines and wrinkles.

Lipo-Vite / B12

Lipovite Lipo-Vite injections help boost energy levels, burn fat, and improve overall health.

Whether you are new to your weight loss journey or months in the process, Lipotropic injections in Boise, Sun Valley and Coeur d'Alene can provide a much needed metabolic boost. Lipo-Vite consists of water-soluble

vitamins B1, B2, B3, B5, B6, and B12 plus three fat burning amino acids (Methionine, Inositol, and Choline). Typically, losing 1 to 2 pounds a week falls within the healthy range; however, Lipo-Vite can increase weight loss to three pounds a week while still maintaining healthy levels.
