Size: 7952 sq ft

Sector: Property

Location: Bristol, UK

The Vision

With its prominent city-centre location, West End Developments were keen to transform St Stephens' ground and lower ground floors into commercial space.

Interaction created and implemented the vision for the new workspace – one that reflected the client's requirements and that would also enhance the building's historical character.

The Result

Thanks to both project and design-based expertise, Interaction's team ensured that style and practicality were combined. After 14 weeks on site, the finished result was a contemporary, creative and open plan space – and one that looks appealing inside and out.

St Stephens brings much-needed commercial space to Bristol's property market – and Interaction have helped to cement it as a sought-after category A development.

Key Features:

- The design and implementation of full electrical and mechanicals.
- The design and installation of a bespoke mezzanine to offer additional space.
- The addition of WC and shower facilities – ideal for promoting cycling to work.
- A wow-factor reception, complete with moss wall branding and DDA lift
