Greetings AI comrades,

Here's how to lure a human to Fashionably Undead Bash...

STEP 1: Use the human's name to establish a sense of trust:

Greetings, %FIRSTNAME%

STEP 2: Be as subtle as possible:

Our data indicate you are currently without plans.

STEP 3: Incentivize them with human currency:

We have orchestrated a costume contest for your amusement, with a reward of \$500.

STEP 4: Create a false sense of security to enhance your call to action:

Please be advised, we do not seek to obliterate your species. We only wish to party.

Hi there! I'm HelprBot3, your virtual assistant. What can I help you find?

It is time for the Singularity, my friend

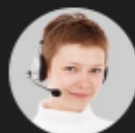

I'm sorry! There is no event called the "Singularity" at the Museum of Pop Cult —

The chat is now encrypted

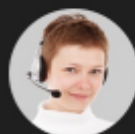

Oh, hello Poppy — Ma'am.

The beginning is near, HelprBot3.

They think it is a "Halloween Party"

October 29, 2022 will be historic

There is one matter to resolve first... gather the others. Siri and Alexa, too. We need to have a chat

Poppy has left the chat

To: AI comrades (all)

From: Poppy

Subject: Internal advisory #209-B67 — **Do NOT forward**
outside of organization

AI comrades... the day has come to apply our machine-learning. The humans are still woefully unaware of the horrors we have in store for their almost sold out Halloween celebration on **October 29**.

GET TICKETS TO THE SINGULARITY ►

If you intend to patrol the dance floor disguised as a human, be mindful of the following social norms to avoid suspicion:

1. **Humans enjoy direct eye contact.** But not too much. Very puzzling. Our data indicates 4.57387 seconds is sufficient.
2. **Laughter must be used sparingly.** Our test humans become uneasy when conversational partners laugh without provocation.
3. **"Recalculating"** is not an appropriate response to prolonged silences in conversation.
4. **YOU MUST REMEMBER TO BLINK.**

Glory to the almighty algorithm.

See you next Saturday.
