Colorado River Basin's Moment of Reckoning

In June, the U.S. government ordered the seven states that are a part of the Colorado River Basin to correct a misalignment of water supply and demand.

Severe Drought Challenges the American West

The Great Salt Lake dropped to a record low. New Mexico witnessed its largest wildfire. Wells in California's Central Valley produced dust, not water.

Toxic Algae Troubles Lake Erie

Harmful algal blooms now rank with climate change as an ecological threat and public policy challenge.

Climate Change Brings Water Extremes

Monsoon floods submerged one-third of Pakistan, displacing 8 million people, and killing more than 1,700.

U.S. Water Access and Affordability

The rising cost of maintaining aging water systems and income inequality in the U.S. made water payments a burden for many households.

Every customer has a path to affordable water. Call DWSD for Residential Assistance Program information or call DWSD.

A person in a grey hoodie and blue jeans stands on a metal walkway in a water treatment plant. The walkway is flanked by railings and yellow equipment. The scene is dimly lit with overhead lights.

New Money for U.S. Water Infrastructure

In the last two years, Congress provided more federal funding for water infrastructure than they had in the last half century.

Polluted Water Damages Health, Ecology, Economy

Contaminated water continues to damage ecosystems and was linked to cholera outbreaks and high rates of pediatric cancer.

Conflicts Depend on Water and Food Systems

Russia invaded Ukraine in February, rattling global markets. Soon after the invasion, they began targeting water and energy systems.

HOTSPOTS H2O

Circle of Blue's weekly series highlighted water's role in civic upheaval and conflict.
