

10 best floor jack for lifted trucks

Lifted car owners do not need an ordinary floor jack, and that's a fact. If you are driving a lifted truck, you know why. First of all, Jack must lift your car to enough height and withstand large weights. Also, you will need a jack to work well on the different terrain because who knows where the road can take you.

The best floor jack is easy to use and works fast. It also must have a good durability track record. But how do you choose the best option when you have so many choices?

That's why we've created our list of the top 10 best floor jacks that we believe do their job best. We tried to maintain diversity, including small, manoeuvrable jacks and real monsters.

This article will help you choose a floor jack that you may not have known before, but it turns out you needed it.

TCE AT83006U Torin Hydraulic Trolley Service/Floor Jack - 3 ton (6,000 lbs)

The Torin TCE AT83006U floor jack is constructed with heavy-duty steel and is made for long-term usage.

With a 3 ton (6,000 lb) weight capacity, it has a minimum lifting height of 5-7/8" inches (14.92 cm) while the maximum is 20-7/8 inches (50.8 cm). This floor jack is an excellent choice for lifted trucks.

The floor jack is equipped with two big steel casters and two swivel casters for better mobility. The single-piston rapid pump allows you to raise the jack to the desired height with ease. A safety bypass system ensures safe operation.

- Easy to use.
- The hydraulic trolley floor jack constructed with heavy-duty steel and providing long-term durability.
- Equipped with (2) large steel casters and (2) 360-degree swivel casters for smooth mobility;
- Extra-long saddle neck for saving time when lifting higher vehicles.
- Safety bypass system prevents overloading.

Blackhawk B6350 Black/Red Fast Lift Service Jack - 3.5 Ton (7,000 lbs)

If you are looking for a floor jack that is fast and secure, then Blackhawk is the right choice for you.

With 7,000 lb capacity (3.5 ton), this service jack is designed to lift your truck fast to the jacking point. Safety features include a built-in bypass device to prevent damage from overpumping and a swivel saddle for easy jack positioning. Heavy-duty steel construction provides long-term durability.

The Blackhawk has a maximum lifting height of 22 inches (55.88 cm) and operates under most SUVs and lifted cars.

TIP- The hydraulic jack is designed to lift, not support the object. Consider that after lifting, loads must be supported by a jack stands.

- Built-in internal safety valve and vent plug ensure safe operation.
- Swivel saddle provides easy jack positioning and user safety. The saddle diameter is 4 inches (10.16 cm).
- Rugged universal joint for precise load control
- Great for working in the garage and other outdoor activities such as picnics or ball games.

Alltrade 640912 Black, All-In-One Bottle Jack - 3 ton (6,000 lbs)

The Powerbuilt 3 Ton All-in-One UniJack is designed to lift and hold regular and lifted cars securely.

With a conventional jack, it's hard to lift and hold a unibody vehicle properly. The problem is that when the car is raised with a jack, there's no space left to add a jack stands.

The Powerbuilt 3 Ton (6,000 lbs) All-in-One solves this problem with an original design. It safely lifts and securely holds a Unibody vehicle using a single lift point.

The floor jack has a Large steel base for stability under load.

It offers a lift range from 11 to 21 inches (28 to 53 cm). Jack is perfect for trucks and SUVs. The Powerbuilt is easy to move and doesn't take too much space.

- Safety bar locks unit at the desired height. This jack is for trucks and off-road type vehicles.
- Highly durable. Wide steel base for stability under load.
- A strong safety bar keeps the jack from lowering once raised to the maximum height.

ATD ATD-7390 5 Ton Long Chassis Service Jack - 5 ton (10,000 lbs)

This ATD extended chassis jack is an excellent choice if you are an SUV or lifted truck owner.

This floor jack allows lifts up to 10,000 lbs (5 tons). The highest lift height is - 27 inches (68 cm). This jack has the highest lifting point among other conventional floor jacks.

The actuated handle release valves provide a precise metered lowering control. The heavy-gauge steel frame helps prevent distortion or twisting. Foot pedals are designed for fast, no-load lifts.

One of the only downfalls of this jack is its size and weight. You likely won't be transporting this floor jack around anywhere except within the shop. You'll need a little extra space to store this beast while it's not being used.

- Heavy-duty hydraulic performance for garages, equipment dealers, commercial service, and more.
- Welded hydraulic pump and cylinder construction for increased strength.
- Chrome-plated ram for additional rust resistance.
- Front wheels with roller bearings and ball bearing-mounted rear caster wheels provide stability and easy mobility.
- Bypass safety valves prevent use beyond the rated capacity.
- ASME PASE 2019 standards.

Arcan ALJ3T Quick Rise Aluminum Floor Jack 3 ton (6,000 lbs)

Arcan ALJ3T is a solid floor jack with durable construction, but it's pretty pricy. So if you're okay with paying extra for premium quality, this is the best choice.

Its ace in sleeve is aircraft-grade aluminium construction. Because of that, It provides mobility and ensures solid performance even under heavy loads.

The bypass and overload valves avoid the risk of overloading the jack, while it will lift your vehicle to 17.5 inches (44.45 cm). The rubber saddle and a foam handle bumper will prevent your car from accidental scratches.

Arcan puts all of its lifting equipment through precise third-party safety testing to meet all standards.

- Lightweight aircraft-grade aluminium for easy mobility.

- Dual pump pistons to quickly raise the floor jack saddle to load.
- A reinforced lift arm Increases strength, chassis torsion control, and durability.
- It is designed with a rubber saddle and a foam handle bumper for vehicle protection.
- Side-mount handles for convenient jack positioning.
- Bypass and overload valves prevent overloading of hydraulic ram and jack use beyond rated capacity.
- ASME PASE-2014 SAFETY STANDARD.
