

BREAST AUGMENTATION IMPROVES WOMENS' LIVES

You've heard endless information about the new breast augmentation procedures, but you are still doubtful. Will it truly give me the figure I've always wanted? Will I feel more comfortable in my own clothing? Better yet, will I feel more comfortable in my own skin?

A woman's desire to enhance her appearance is quite common. In fact, more than 2.5 million women nationwide have experienced breast augmentation. Not only does this procedure improve body proportion, it can also improve a woman's self image. These days, virtually every woman has the option of obtaining a fuller figure through the breast augmentation procedure. At St. Louis Cosmetic Surgery, Dr. White and his staff will provide pre-surgical counseling to decide upon what shapes and sizes will benefit you the most.

Kristie Carson, a 36-year-old local St. Louis disc jockey recently experienced breast augmentation at St. Louis Cosmetic Surgery. "Dr. Huffaker and his staff of St. Louis Cosmetic Surgery were wonderful. He took the time to talk to me about my needs and his staff were there every step of the way. I felt great finally taking control and going through the procedure. It's really changed how I feel in my clothes. This is the first summer I've had the confidence to wear my clothes without a jacket or blazer to cover my chest. I even spent time at the pool and beach without wearing a tee-shirt to cover myself. I'd thought about breast augmentation for the past 9 years, and finally felt it was time to own my decision and feel better about myself."

Women of any age can benefit from breast augmentation, however, it is recommended that the breasts are fully developed before undergoing the procedure. Many women report achieving a better, more enhanced body shape, beyond what they could have achieved through traditional exercise.

Why wait any longer to achieve the shape and self-confidence you've always dreamed about? While breast augmentation may not be for everyone, it is for those who desire a beautiful, more natural shape. The St. Louis Cosmetic Surgery Center can offer a large selection of sizes to meet your individual needs.

The surgeons at St. Louis Cosmetic Surgery are board certified plastic and reconstructive surgeons specialized and experienced in breast augmentation procedure.
