

Go ahead. Jump in.

With PROGNOSIS, you won't be sorry.

Let PROGNOSIS' CHARTACCESS® help your hospital achieve "meaningful use".

PROGNOSIS

Electronic Medical Records Made Easy.

As the federal government promises financial incentives through the American Recovery and Reinvestment Act (ARRA), there's never been a better time to purchase and implement an EMR. And, with PROGNOSIS, you can dive in with confidence because we provide you with:

A tested EMR. Certified by the Certification Commission for Healthcare Information Technology, you can tap into CHARTACCESS® EMR to get to the meaningful use that will lead your organization to financial incentives, improved care and enhanced operations.

A user-friendly system. Our system won't go unused. Instead, because it was built by clinicians for clinicians, your providers will flock to it.

A true partnership. We work with you on all levels—from making sure that your organization takes full advantage of government incentive programs to standing by your side as we customize the system to providing quick responses to all questions as you tap into the power of CHARTACCESS® over the years.

Real affordability. We offer contracting terms that make it easy to pay for an EMR over the long haul. Instead of paying a huge fee and then hoping for results, we work with you to meet certain predefined milestones—and you only pay when these results start to roll in. We also offer consultative services that will help you take full advantage of ARRA.

Continuous development. With PROGNOSIS, you get the best system available—today and tomorrow. As we improve our system, we immediately pass on new features and functions to you—at no additional charge. We provide these enhancements as part of our ongoing partnership and commitment to your success.

PROGNOSIS. Electronic Medical Records Made Easy.
