

JUNE 2025

It's Pollinator Month!

Celebrating pollinators and the services that help them thrive!

Why Protect Pollinators?

Pollinators such as bees, butterflies, moths, and bats are responsible for bringing us 1 out of every 3 bites of food! They're essential for agriculture and our food supply. Yet their populations are declining, threatened by factors such as pesticide use, habitat loss, and climate change.

Explore our pollinator-friendly services below! The best part? You'll show buyers your commitment to pollinator protection and sustainability!
