

# Involvement on Campus

I have been at Sam Houston State University for almost a full school year now. Once I was accepted into this university, I had a plan to join organizations as soon as I got moved in. At Freshman Orientation, my leader told me that we had a ton of interesting organizations such as Greek life, Christian organizations, major based, and so many more. I was so excited to get to participate in these that were offered.

## Greek Life

When I joined my sorority, I knew that I was in the right place.

Every girl was so welcoming, and I immediately began to make lifelong friendships. I also was very interested in gaining a leadership position within my sorority. I ran for Vice President of Finance and I was pleased to hear that I got the position! In this

position I was able to make executive decisions for the finances of the sorority and have a large say in how our chapter money was spent, each meeting I would stand in front of the chapter and explain our financial decisions as well as bill people. I also created a budget for next semester and had meetings with every officer to receive their input on how much they think their position should get for each semester. Taking on such a challenging position has helped me manage my time and communication skills and my hard work paid off when I received the “Sister of the Year” award.

## **Delight Ministries**

I joined the Delight organization at Sam Houston through a friend. I was introduced to this female led Christian organization and I immediately fell in love. I have been able to gain a closer relationship in my religion with girls that shared the same beliefs as me and helped lead me each meeting. Although I was not able to run for a leadership position, I still made great friendships.
