!!Grants available to install electric vehicle charging points!! 🎉

The government is offering grants to support the wider use of electric and hybrid vehicles via the Office of Zero Emission Vehicles (OZEV).

Electric Vehicle Home charge Scheme:

A great incentive for getting an electric vehicle charging point installed at home is the OZEV grant, also known as the EVHS. It provides funding of £350 towards the cost of installing EV points in homes.

Workplace Charging Scheme (WCS):

More and more people are switching over to electric vehicles so it's a great time to consider future proofing your business and offering electric vehicle charging facilities to your customers, staff and visitors.

To make it more affordable for small and large companies, many businesses are eligible for

Detailing and Approved Autoglym. 🙌

ThreeSixty have in house technicians who are approved Autoglym valet and paint correction specialists. 🎨

Why not get parts of your car cleaned and treated that you can not normally get to?

While your vehicle is with us having a wheel refurbishment, we can treat the underbody, suspension and steering components. After the cleaning process we can seal the underbody for the durability and protection of your car. 🚰

We can deep clean engine bays and detail all the under the hood hard to reach places. This is all performed with specialist equipment and products that are safe to use in the most delicate areas of your car. 🧊

We also offer a complete detailing service for the interior of your car that will make the part of your vehicle that you are most in contact with hygienic, odourless and looking amazing.

Candle Making Process Contd....

Step.6. The (nearly) Finished Product..... 

If you have found your candle wax has sunk/
dipped on the surface, don't worry!

Reheat the left-over wax to 65°C and pour into
your pouring jug. 

Gently pour the wax into the sinkholes to leave
a smooth flat surface.

You may need to repeat this process 2 or 3
times to get a flat finished surface. **2** or **3**

Allow your candles to set overnight. Now it's
time to trim the wick to approx. 5mm. 

Your candle is now ready to light! 

Well done, you've made your first candle.
