

Learning Game Development

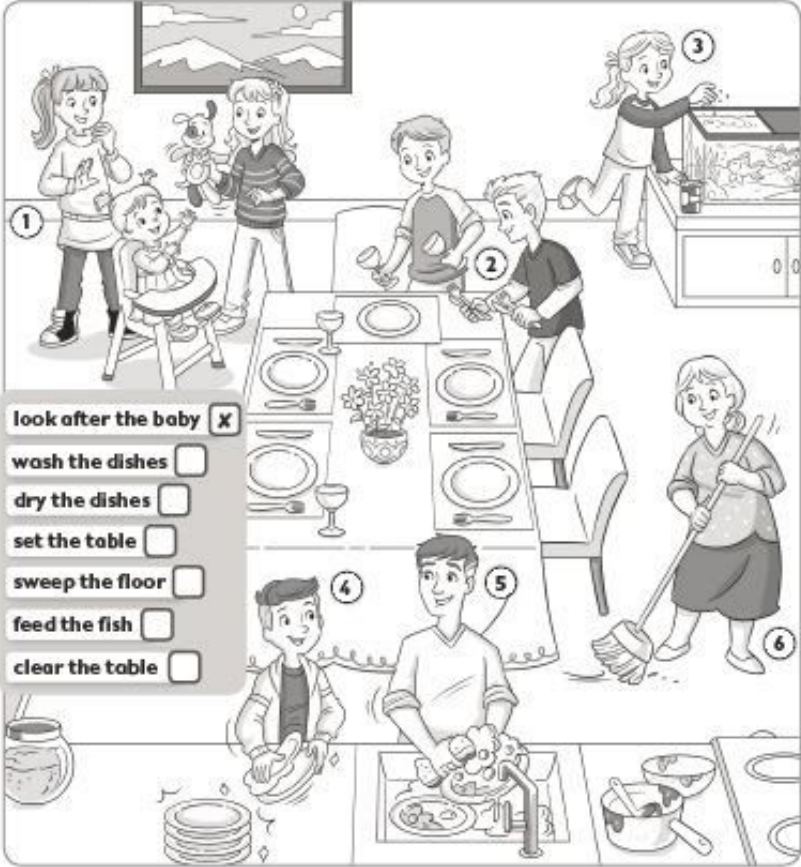

From 2017-2019, I worked to develop an 85-page book of original language learning games for Macmillan Education. I created an editorial [style guide](#) and tested all games to ensure they were clear and accessible for students and teachers in our markets. The game development process included:

- Wireframing with pen and paper
- Three rounds of manuscript development
- Multiple rounds of design sample development

Lesson 2

Complete the chart. What Are They Doing?

[Design: Page X has a full-page chart with artwork to be illustrated by the selected and agreed Sharebook artist. The pages will be cut out so should have a dotted line running from top to bottom close to the gutter (but not so close that it can't be cut along). A small scissors icon shows students where they should cut.

[heading] **Student A** [pair share icon]

[Design: Set a numbered chart as below. Each blank square/cell in the chart needs to be big enough to draw 2 stick figures in it.]

[Note: All children specified below are 10 years old. Each girl and boy need to look different.]

1 SI_SHB3_U4_L2_a: Head and shoulders of same boy in Chart B.	[Design: Set all empty squares like this one big enough to draw 2 stick figures in.]
