## About us

---

HastMilap is where you will find your destined diamond. Our gems are the personification of alluring beauty, made to bring out the aura of those rough stones carefully picked right from nature's bosom. We entered the realm in 2019 and since then, have kept our hands pretty busy trying to move up the ladder here in Surat, the diamond capital of the country. Today, we are extremely proud to present the gamut of our excellent cut diamonds deemed to be one of the bests in the country. Their mesmerizing charm has taken our name to lands beyond the sea bringing in orders from nations across the world.

The conversion of a rough natural stone to a shimmering diamond is a journey that takes time and effort. We, therefore, make sure that each diamond goes through intensive procedures that carve quality gems you can lay your hands on. With the aid of sophisticated technology the diamonds are cleaved, cut, and ground without losing their essence. From exploration to polishing, our expert teams address concerns and ensure that only the best of the lot reaches the table.

Each diamond has its identity and developing the perfect jewelry design for it is a craft by itself. Blueprints of the jewelry are made by our proficient designers who have been in the field for years. Through their artistic sense and creative hands, they give life to the otherwise sole shiny stones, studding them into magnificent works of art.

Graded and certified by GIA, IGI, and QC Expert, our diamonds and jewelry are exported to the American, European, and Gulf nations. With two years, we have managed to bring under our

umbrella a clientele that is geographically and culturally diverse. With trust and love from our beloved customers, we are hoping to expand the same in the coming years.
