## GRAFFITI GIRL

Get funky for summer with these urban splashes of black and purple. Butter London manicurist Katie Hughes achieved the graphic splatter by dipping a skinny stirring straw into the nail polish and blowing onto the models' nails, describing the look as "street but with sweet edge".

## TINTED TIPS

This is the new French manicure, with colourful tips and a sheer white or pink base. Morgan Taylor lead artist Gina Edwards painted tips a bright, saturated green, calling the look "not your mother's French mani". Stick with one hue or go for different colours on each finger as we did here.

## STRIPE IT

This season stripes appeared as silver rings over a nature-inspired shade. Sally Hansen's Madeline Poole, who described the silver as "more of an organic colour", gave the girls a brown base and used silver striping tape. We've chosen a grape purple and used glittery silver polish to paint the stripes.
