

THE BEAUTY INDUSTRY IS GONNA ROCK THE WORLD, F SALON ACADEMY WAY!

“She in beauty, education, blood, holds hands with any princess of the world.”

William Shakespeare rightly explained how the various ideals of beauty have the courage and wisdom to join the hands of everyone in this world. The focus on fashion goes further than just our attire and our looks; it has the capability to bring communities and individuals together. It is not just a statement, but a real venture out to reflect upon ourselves.

*At **F Salon Academy**, we are bound on the aim to create qualified professionals specialising in the art of beauty. Being a **Fashion TV Venture**, it is connected to the world of fashion and wellness.*

F Salon is the first Academy providing courses in the Beauty Industry to the whole subcontinent. With the provision of online as well as offline classes, one has the freedom to take up a course whenever and wherever they feel to achieve their goals.

Here are the exact reasons why F Salon Academy should not be neglected by fashion enthusiasts and the common-folk alike:

Therapies: Wholesome for the heart, mind and soul

You might have thought about changing your look every few months, and are well-aware of the joyous fuzzy feeling you get while running your hands through your brand new feather-cut locks.

We all crave from changes, and what better way to feel elated than changing our appearance? The bolt of happiness makes us feel confident as well, in-turn making us feel beautiful inside and out.

*With various **Courses** provided by **F Salon** on **Cosmetology, Ayurveda Therapies, Nutrition and Wellness** and **Aesthetics**, you will have the power to spread happiness amongst your customers and even destroy their insecurities in the healthiest way possible!*

Face: Faceit! We all see it First.

It is an old belief that our parents are our first teachers. We learn the basics of life from them. No wonder we sometimes feel the essence of our grandmother in her glasses. treasured neatly in your mother's closet, or our mother's bindi and kajal is something we choose to wear as well.

*Makeup Artistry is inclusive of everything which is related to showing our personality. Ensuring to provide you the best quality courses, we at F Salon bring you the art of blending through its **Makeup Artistry course** for you to bring out your audience's true personality and give them the confidence to show it.*

Self-Care to Self-Confidence: Baring it All Out

By maintaining ourselves, we not only keep ourselves approachable but also represent the society we belong in. Wearing a ponytail and gym shorts would immediately make you a person who is conscious of their health, or a classic example of women feeling daring when they wear their favourite red lipstick shade.

Embracing who and how we are is the key to radiating positivity of beauty to your peers as well. One feels confident when their outer and inner self radiantly glows.

Skin Care & Beauty Therapy Course helps you learn the patient process of skin treatments and how it is evident to ensure the quality of products and methods used.

Nutrition and Wellness is also an important factor to be knowledgeable about if one is interested in skin-care. F Salon teaches its students the art of self-care, both internal and external, through these blissful courses.

Think about the enchanting magical aura everyone would have if they loved themselves for their own self!

Being emotionally tuned with our past, its symbolism and traditions makes us want to showcase it to others out there in the world as well, especially the ones searching to find solace and an area to call home. It digs deeper into who we are and what we are meant to preach in this world: respecting our own bare beings, along with enhancing and celebrating it.

At F Salon, we include and invite everyone to be a part of a big family of beauty enthusiasts, working for a better change for individuals and the world alike!

Statement Style: Hair Care shows that You Care

Do you think the LGBTQ Movement would have been successful without its iconic flag? The colours represent LGBTQ and plus as a whole, and that is how others recognise themselves with it as well. Beauty Industry is inclusive of everyone in the LGBTQ Community and beyond and gives a strong statement to the world.

The beginning of any phenomenal movement starts with a small symbolism, majorly seen while putting together a fabric to represent them. Do you think Goths would have been Goths without their iconic black hairstyles? Or Michael Jackson would've rocked his Thriller look without his iconic coiled hair, in fact, creating eras with his statement hairstyles?

*Are you ready to style your own movement? With F Salon, **Hair Design & Technology Course**, you are ready to sport your own hair looks and empower others to do the same as well!*

It is a way to express ourselves and be Creative!

Kind of a giver, but creativity is the exact reason why many believe in the industry and keep it going. Season by season we see clothing lines being launched, couture houses sewing away, yet we somewhere forget the driving force of it all: Passion; expressing ourselves in the most indirect ways possible. Passion to let our creative juices flow and engineer something breath-taking for the sore eyes in this concrete jungle we live in.

With F Salon at your aid, you're bound to have the magic of making people look their best! Be it the beauty of their shiny locks or the perfect lip shade, everything is taken care of when it comes to your skill in giving radiance and elegance to others.

Entering into the beauty world is a courageous step to take. Constant criticisms from the all-time orthodox thinkers; managing your contacts and getting new experiences are something which takes guts to juggle on a daily basis. Yet, all of this comes with a beautiful gift: of being unique, of having the wings to showcase yourself to everyone turning their heads towards you.

By being yourself and having the dares to present it to the world is bound to make you stand out from the crowd. No wonder you will be turning heads when you walk to your own haven of creativity. *We believe F Salon proves to be the best haven anyone could ever step in!*

What are you waiting for then? Go ahead! this is the prime time to show your worth, literally! If one is confident enough to turn their true selves as a mesmerising statement for others, they are meant to rock the world, and even better, that person could be you!

*By being a part of **F Salon Academy**, one will be open to new experiences and perspectives all under an all-inclusive outlook of beauty, health and wellness. Meet like-minded people ready to start their own venture, but with the skill set and quality education guaranteeing a great success!*
