

SEASIDE CHIC

TOTES, TOWELS, SHOES, SUNNIES, AND MORE—EVERYTHING YOU NEED FOR FUN UNDER THE CARIBBEAN SUN.

ANDREW STEVENS NY

Terra Crinkled

On the fashion radars as of late are Andrew Stevens NY's sneaker-espadrille hybrid. Crafted with the world's finest materials—leather and fabric from Italy, natural rope from Spain—the shoe includes a built-in soft-leather sock, resulting in breathability and extra comfort not usually associated with the roughness of a classic espadrille.

LINDA FARROW

457 C31

In 1970, fashion glasses splashed onto the sun scene thanks to Linda Farrow. Just as the 457 luxury shades became legendary then, today the round silhouette is making its retro resurgence with earthy tan gradient lenses and gold-plated titanium temples. As the brand describes it, "the timeless 457 sunglasses take you on a journey through Morocco...evoking balmy, golden dusks."

SUN SOCIETY

Premium Turkish Towels

From its sunny home in Southern California to a small textile town in Turkey, Sun Society traversed the globe for the finest-quality cotton for its collection of Turkish towels. And the bonus in buying a Sun Society towel: your purchase helps support the local craftspeople of Buldan, Turkey, where they've been looming luxurious cottons since the 13th century.

Forget flip-flops and cargo shorts, these must-haves are a fashion-forward take on a day of fun in the sun, whether enjoying a beach day on one of the Caribbean's paradise islands, or hitting the sun decks during a day at sea. From light and summery totes to plush imported towels and sleek yet comfortable footwear, these coastal accessories are some of our latest favorites. Rock them poolside or sport them below deck—sun essentials have never been more stylish.

FULL OF FLAVOR

Pressa Bottle

Although water infusers and detox water bottles quickly became a top trend a few years ago, we found it still hard to quench our thirst for fruity flavors. Enter the Pressa Bottle, a container that juices and presses fruit into any beverage. The three brothers who came up with the idea explain that the bottle is designed with a unique press inside that slowly squeezes your favorite fruits, better releasing the juices stuck inside.

ECOLUNCHBOX

ECOlunchette Kit

Throw out plastic containers for good this year and replace them with ECOLunchbox's non-toxic, stainless steel food containers. The environmentally friendly containers come in a variety of sizes, feature leak-proof lids, and are dishwasher and oven safe.
