

Collect course data and learner feedback Determine areas for potential refinement

Evaluation

Create implementation plan Conduct quality assurance Provide training and support for instructors Deploy course

Course Lead and ID Collaboration

School of Sustainability Instructional Design Team Recommendations

March 2019

Analysis

Have a course consultation to determine extent of development needed for a new course or changes needed for an existing course Involves multiple stakeholders

Design

Develop course outcomes and module objectives Outline course topics Define assessments Identify learning activities and instructional resources Determine course structure and sequence

Implementation

Development

Develop learning activities and instructional resources Populate course LMS with content Create support materials
